Rs. 10

Foreword.

1. The 1941 census brought many new features. Most of them gave expression to certain convictions on my part of the course India's census should take, but some followed from incidents in the actual course of the operations. One of the latter was the departure, before tabulation, of the census superintendent for Central India. Instead of attempting to get another officer for the post, I decided that the Local Officers should carry out the tabulations within the State, and thus we have the first tabular record for Rewa prepared in Rewa.

2. Action should spring from the head as well as from the heart. In other words, there should be knowledge as well as emotion. The basis of administration is knowledge of all facts bearing on the life of the people who are the administrator's concern. The bulk of the information is collected by the census and in general the provision of this factual information, its importance, and its dissemination among the people should be the fundamental aim. The perfect statistic, I have said elsewhere, is a by-product and the perfect census would spring from the daily incidents of the people's life rather than from 10-yearly performances. I hope that Rewa State having done its first census tabulation will keep in view the objective of linking its census up more and more with ordinary information channels and purposes and so take to its proper end the work Mr. Dube has so worthily begun.

3. All new departures are difficult and this survey by Mr. Dube is no exception. I commend it therefore to the attention and recognition of the State and its people.

M. YEATTS,

Census Commissioner for India.

VOLUME II contains Imperial and Subsidiary Tables	1—255
VOLUME III contains list of Villages in Rewa State for every Tahsil giving details of populations of main communities in every village (published separately).	

INTRODUCTORY

The Census of 1941 is the seventh decennial enumeration of the people of the State. All the censuses in the State have been synchronous with those in the rest of India.

2. In the census of 1941 there were 18 charges, 950 circles, 12,113 blocks in the State. The following officers were appointed Charge Superintendents by sanction of the Durbar. All the Charge Superintendents made their fullest endeavours to make the work entrusted to them a success. Without their care and interest the House-numbering, enumeration and despatch of provisional tables would not have been satisfactory and according to schedule. I express my thanks to them.

S. N.	Charge.	Charge Superintendent.
1	Rewa City	Lal Shankh Dhar Singh, B.A., LL.B., Secretary, Municipal Board.
2	Rewa Military Lines ..	Lt. Sajjad Husain, Rewa Artillery.
3	Hazur Tahsil	Pt. Har Prashad Tiwari, Tahsildar.
4	Raghurajnagar	Munshi Gaibinath, Tahsildar.
5	Satna Town	Pt. Jageshwar Prashad, B.A., LL.B., Chairman, Municipal Board.
6	Teonthar Tahsil	Lal Suraj Narain Singh, Tahsildar.
7	Mauganj	Lal Anirudha Singh, Tahsildar.
8	Sirmaur	Lal Mangleshwar Singh, Tahsildar.
9	Bhandhogarh	Pt. Kripa Shankar, B.A., LL.B., Tahsildar.
10	Sohagpur	Lal Harmangal Singh, Tahsildar.
11	Pushprajgarh	Lal Yadava Raj Singh, Tahsildar.
12	Shahdol Town	Pt. Janki Prashad, B.A., Headmaster, A. V. M. School.
13	Umaria Town	B. Bishnu Prashad, B.A., LL.B., Chairman, Municipal Board.
14	Gopad-Banas	B. Balmukund, Tahsildar.
15	Deosar Tahsil	B. Shree Gopal Narain, B.A., Tahsildar.
16	Singrauli	Lal Chandra Bhan Singh, Tahsildar.
17	Beohari	Lal Srutwant Singh, Tahsildar.
18	Govindgarh Town ..	Lal Badri Singh, Assistant Tahsildar.

3. Lt.-Col. R. P. Watts, Superintendent, Census, C.I., visited the State twice before the enumeration and explained the procedure to be adopted in carrying out the census of the State. This was my third census in the State. His personal discussions and detailed instructions were of the greatest help to me in preparing the village Registers and carrying out the House-numbering and the enumeration. I acknowledge with thanks his readiness in promptly elucidating my difficulties that I referred to him.

4. Lt.-Col. R. P. Watts had to leave for Persia on War duties just after the enumeration. M. W. W. M. Yeatts, Esq., I.C.S., C.I.E., the Census Commissioner for the Government of India, decided that unlike the previous Censuses the Sorting of the Slips, the Compilation and Tabulation of the statistics should be done at Rewa.

5. I express my deep sense of obligation to the Census Commissioner for his personal discussions and very detailed and timely instructions from time to time about sorting, compilation, tabulation and report ; but for them I would not have been able to do anything, as Sorting, Compilation, Abstraction and Tabulation was never done at Rewa before and I could not get a single local clerk or official in my census office who could claim any acquaintance with this sort of work. Mr. Prabho Narain Khanna, M.A., Tahsildar, was put in charge of the sorting office at Rewa. He managed the big sorting office tactfully.

6. People of the State co-operated fully in the census work. All the Departments of the State gave their full co-operation. Durbar Order was promulgated on the lines of the Census Act of India giving powers to the Tahsildar for fining persons who refused to do the Census work entrusted to them.

7. I tender my best thanks to Major L. W. Wooldridge, I.A., Administrator, Rewa State, for his ready help in all matters that I had to refer to him. Last but not least, I acknowledge with thanks the help and guidance so kindly given to me by Dewan Bahadur Pt. Braj Mohan Nath Zutshi, O.B.E., Vice-President, State Council.

SIDHI (REWA STATE),
14th November 1943.

N. K. DUBE,
Census Officer, Rewa State.

NOTE—1. The author is wholly responsible for the views and opinions expressed in this report.

2. Imperial and Subsidiary Tables are in Vol. II and List of Villages with population in Vol. III.

CHAPTER I.—General.

Reference :—Imperial Tables 1, 2.

Subsidiary Tables :—1 (i), 1 (ii),
1 (iii), 2 (i).

POPULATION. DENSITY. VARIATION. HOUSES. VILLAGES. LIVE STOCK. AGRICULTURE.

Rewa State :—The map forming the frontispiece shows the territory that constitutes the Rewa State. It lies between 22°-30' and 25°-12' north latitude and 80°-32' and 82°-51' east longitude. On the north it is bordered by the Banda and Allahabad districts of the United Provinces and by the Panna State; on the west by the States of Sohawal, Nagod, Maihar and by the Jubbulpore District of the Central Provinces; on the east by Korea and Changbhakhar and Sarguja States and the Mirzapore district of the United Provinces. On the south by Mandla District of C. P. So the State is quite compact except for one village of the State in the middle of the Allahabad district and two villages of that district in the middle of Teonthar the northern Tahsil of the State, and a village of the State on the western boundary which only just fails to connect with its neighbours in Tahsil Raghurajnagar of the Rewa State. Area of Rewa State is 13,000 sq. miles and population in 1941 is 18,20,445 as compared with 15,87,445 in 1931. During the decade there has been an increase of 14.7 per cent in the population of the State.

Main Natural Divisions :—The State is divided into three natural divisions. First natural division is a distant fringe of the Gangetic Plain south of Allahabad district comprising Teonthar, the northern-most Tahsil of the State. The second natural division of the State is the Rewa Plateau. It is between the Vindhya-chal and the Kaimur, running west to east. Tahsils Raghurajnagar, Sirmaur, Hazoor and Mauganj are the Tahsils on this plateau. The plateau is traversed by the rivers Tons, Bihar, Mahana, Sengri, Odda and Salar, all rising in the Kaimur in the south, flowing towards the north almost parallel to one another and after forming the beautiful waterfalls of Purwa, Chachai, Kewati, Bahuti and Hatwa, leave the plateau and join the Tons in the Teonthar Tahsil. Tons, in its turn, joins the Ganges in Mirzapur district of U.P. The first and the second natural divisions comprise the North District of the State.

The third natural division of the State is between the Kaimur and the Narbada river which from its source forms the southern boundary of the State for a distance of about fifty miles. This portion is full of hills running mostly from west to east and valleys with rivers, such as the Son, the Johilla, the Gopad, the Banas and the Rend. It is full of thick and extensive beautiful forests of teak and bamboo. Coal and Corundum is excavated in this area. The Maikal Range is the chief range in the south, the highest peak attaining a height of nearly 4,000 ft. The third natural division comprises the Eastern District and the Southern District of the State.

Administrative Divisions in the State as existing in 1941 :—The State is divided in three districts, *viz.*, North Rewa, East Rewa, and South Rewa. The districts have the following Tahsils :—

1. North Rewa District :—
 1. Hazur Tahsil.
 2. Raghurajnagar Tahsil.
 3. Sirmaur Tahsil.
 4. Mauganj Tahsil.
 5. Teonthar Tahsil.

2. East Rewa District :—
 1. Gopad-Banas Tahsil.
 2. Deosar Tahsil.
 3. Singrauli Tahsil.
3. South Rewa District :—
 1. Beohari Tahsil.
 2. Bandhogarh Tahsil.
 3. Sohagpur Tahsil.
 4. Pushprajgarh Tahsil.

Changes in the Administrative Divisions during 1931-1941 :—During the last decade villages on the Maikal plateau have been taken out from Sohagpur Tahsil and have been formed into a new Tahsil which has been named Pushprajgarh. Its headquarters are at Basaniha. Amarkantak, the sacred place of Hindu pilgrimage on account of its being the source of the sacred river Nerbada, is situated in this Tahsil. The population of Pushprajgarh Tahsil mainly consists of Gonds and Baigas. The constitution of a separate Tahsil will very much help the development and progress of this backward part of the State. Villages east of the Son which were formerly in Bandhogarh Tahsil have been transferred to Sohagpur Tahsil as, during the rains, people of these villages found it difficult to reach the Tahsil headquarters at Umaria. On account of the easier access to Shahdol and better marketing facilities at Shahdol, the people of this group of villages will benefit by the change.

Similarly, some villages of Deosar Tahsil which were nearer to the Headquarters of Singrauli Tahsil have been taken out from Deosar Tahsil and have been incorporated in Singrauli for the convenience of the people in Tahsil Singrauli.

Area, Population and Density :—Rewa State has an area of 13,000 sq. miles. In the census of 1941 the population of the State has been found out to be 1,820,445 as compared to 1,587,445 in 1931, which is an increase of 14.67 per cent. The variation during the decade has been as follows in the first 12 States with a population of over ten lacs.

The first 12 States with over ten lacs inhabitants are :—

States.	1941.	1931.	Variation %.
	Figures in thousands.		
1. Hyderabad	1,61,84	1,44,36	12%
2. Mysore	73,29	65,57	11%
3. Travancore	60,70	50,95	19%
4. Kashmere	40,21	36,46	10%
5. Gwalior	39,92	35,23	13%
6. Jaipur	30,41	26,31	15%
7. Baroda	28,55	24,43	16%
8. Marwar	25,56	21,25	20%
9. Mewar	19,27	15,66	23%
10. Patiala	18,93	16,25	16%
11. Rewa	18,20	15,87	15%
12. Indore	15,09	13,18	14%

During the decade the increase in the population of Rewa State has been 14.67 per cent which is nearly equal to the increase in Jaipur (15%), Patiala (16%), Baroda (16%). It is more than in Hyderabad (12%), Mysore (11%), Kashmere (10%), Gwalior (13%), Indore (14%). It is surpassed by Mewar which has shown an increase of 23 per cent, Marwar : 20 per cent and Travancore : 19 per cent.

The following Table shows the population of the C. I. Agency and some Indian States having a population of more than a lac and the variation during the decade, as compared to Rewa State. Orchha State has a variation of 15.22 per cent and Chhatarpur 14.54

per cent, Central India Agency as a whole has a variation of 11.30 per cent, Datia has 9.59 per cent, Panna 8.40 per cent, Bhopal 7.48 per cent, Bijawar has 4.38 per cent and Charkhari has the least 2.70 per cent.

C. I. Agency.	1941.	1931.	Variation.
1. C. I. Agency	75,11,694	66,48,306	11.30%
2. Rewa	18,20,445	15,87,445	14.67%
3. Bhopal	7,84,560	7,29,955	7.48%
4. Orchha	3,62,554	3,14,661	15.22%
5. Datia	1,74,072	1,58,834	9.59%
6. Panna	2,29,955	2,12,130	8.40%
7. Charkhari	1,23,599	1,20,351	2.70%
8. Bijawar	1,20,928	1,15,852	4.38%
9. Chhatarpur	1,84,716	1,61,267	14.54%

Density :—In 1941 density of population in Rewa State has been found to be 140 persons per sq. mile. The table below shows the density of all the Indian States having a population of over a million and some of the States of C.I.

Among these states the density of Travancore's population is the highest. It being 796 persons per sq. mile. Then comes Baroda with a density of 349 per sq. mile. Patiala is the third with a density of 318 per sq. mile. Mysore is fourth with a density of 250 per sq. mile. Hyderabad and Jaipur are fifth in the order of density with 195 per sq. mile. Indore is the sixth with a density of 155, Mewar and Gwalior stand seventh with a density of 151 persons per sq. mile. Rewa State has a density of 140 persons per sq. mile and is eighth in the order of density among the premier Indian States.

States.	Population in 1941.	Area in sq. miles.	Density.
1. Hyderabad	1,61,84,000	82,698	195
2. Mysore	73,29,000	29,326	250
3. Travancore	60,70,000	7,625	796
4. Kashmere	40,21,000	84,516	47
5. Gwalior	39,92,000	26,237	151
6. Jaipur	30,41,000	15,579	195
7. Baroda	28,55,000	8,164	349
8. Marwar	25,56,000	35,016	73
9. Mewar	19,27,000	12,694	152
10. Patiala	18,93,000	5,942	318
11. Rewa	18,20,445	13,000	140
12. Indore	15,09,000	9,731	155
13. Bhopal	7,85,000	6,902	123
14. Central India	75,11,694	52,072	144
15. Panna	2,30,000	2,596	88

Variation in Density during the Decade :—The table below shows the variation in density in Rewa State as compared to the States named below. The variation during the decade in density in Rewa State is an increase of 18 persons per sq. mile. Gwalior State has a similar increase of 18 persons per sq. mile. Indore and Hyderabad have a little higher increase of 20 persons per sq. mile. C.I. as a whole has an increase of only 21 persons per sq. mile during the decade, while Bhopal has only 8, Mewar 12, Kashmere only 4. Travancore has the highest increase of population per sq. mile : 128, next come Baroda : 50, Patiala : 44, Mewar : 29, Mysore and Jaipur : 26 each.

States.	Density in		Variation.
	1931.	1941.	
1. Hyderabad	175	195	+ 20
2. Mysore	224	250	+ 26
3. Travancore	668	796	+ 128
4. Kashmere	43	47	+ 4
5. Gwalior	134	152	+ 18
6. Jaipur	169	195	+ 26
7. Baroda	299	349	+ 50
8. Marwar	61	73	+ 12
9. Mewar	123	152	+ 29
10. Patiala	274	318	+ 44
11. Rewa	122	140	+ 18
12. Indore	135	155	+ 20
13. Bhopal	105	113	+ 8
14. Central India . . .	123	144	+ 21

Area, population and density of the districts and Tahsils of Rewa State are as follows, according to the Census of 1941 :—

Districts and Tahsils.	Area.	Population.	Density in		Variation during the decade in density.
			1931.	1941.	
NORTH DISTRICT	3,515	7,50,478	214	188	+ 26
1. Hazur Tahsil	621	1,93,808	312	281	+ 31
2. Raghurajnagar	645	1,45,431	225	199	+ 26
3. Teonthar	800	1,09,417	136	117	+ 19
4. Sirmaur	550	1,43,725	261	232	+ 29
5. Mauganj	899	1,58,097	176	152	+ 24
EAST DISTRICT	3,927	4,24,159	108	98	+ 10
1. Gopad-Banas	1,594	2,48,829	156	136	+ 20
2. Deosar	1,718	1,00,019	58	51	+ 7
3. Singrauli	615	75,311	122	93	+ 29
SOUTH DISTRICT	5,558	6,45,808	116	97	+ 19
1. Beohari	1,120	1,55,611	139	121	+ 18
2. Bandhogarh	1,291	1,21,189	94	81	+ 13
3. Sohagpur	2,475	3,10,697	125	108	+ 17
4. Pushprajgarh	671	58,311	86		

Among the districts, the North Rewa District has a density of 214 per sq. mile and South Rewa District has a density of 116 and the East District has a density of 108 per sq. mile.

Among the Tahsils Hazur Tahsil has the highest density of 312. It has the capital of the State, Rewa city, within its boundary. Deosar has the lowest density of 58 per sq. mile, though Singrauli, whose head-quarters are 130 miles from the nearest Railway station has a density of 122. Bandhogarh which has the B. N. Rly. line passing through the Tahsil for nearly 30 miles has a density of only 94 which is lower than that of Singrauli. Pushprajgarh, the newly constructed Tahsil on the plateau of Maikal, has a density of only 86. The main population in Deosar, Pushprajgarh and Bandhogarh consists of Gonds, Baigas and the other aboriginal tribes. The population of Singrauli consists of Teli and Kalar who have migrated from Mirzapur District during the last two hundred years. Extensive and dense forests and poor soil in Deosar, Pushprajgarh and Bandhogarh are responsible for the low density. After Hazur Tahsil, Sirmaur has the highest density of 261. Sirmaur is crossed by the rivers Tons, Bihar and Mahana and these rivers have deposited a lot of silt and have given good black and Domat soils to this Tahsil. It is inhabited by Baghels, Brahmins and other caste Hindus. After Sirmaur comes Raghurajnagar with a density of 225. Mauganj has a density of 176 and Teonthar has a density of 136 only, which compares badly with Gopad-Banas : 156 and Beohari 139.

Variation in Density of the Tahsils during the Decade :—The above table shows that during the decade the Northern District has added 26 persons in every sq. mile in its population while the Southern District has shown an increase of 19 persons per sq. mile. The increase in population of the Eastern District has been only 10 persons per sq. mile. Among the Tahsils, Sirmaur and Singrauli have shown equal increase per sq. mile of 29 persons. Hazur Tahsil has highest variation of 31. Deosar has the least having only 7 per sq. mile.

Density and Cultivated Area :—In a State like Rewa where there is no other industry worth the name except agriculture the density of population and its variation depend mostly on the rainfall, cultivable area, the kind of soil, facilities of marketing and irrigation and the habits of the people. The table below gives the average yearly rainfall during the decade. The yearly rainfall in Rewa State is 47 inches.

The Northern Rewa District has 44 inches yearly.

The Eastern Rewa District has 46 inches yearly.

The Southern Rewa District has 51 inches yearly.

Natural Division.							Average yearly rainfall. between 1931 and 1940.
REWA STATE	47 inches.
North Rewa District	44 "
East Rewa District	46 "
South Rewa District	51 "
1. Hazur Tahsil	48 "
2. Raghurajnagar Tahsil	41 "
3. Sirmaur Tahsil	43 "
4. Reonthar Tahsil	44 "
5. Mauganj Tahsil	45 "
6. Gopad-Banas Tahsil	49 "
7. Deosar Tahsil	43 "
8. Singrauli Tahsil	43 "
9. Beohari Tahsil	42 "
10. Bandhogarh Tahsil	55 "
11. Sohagpur Tahsil	53 "
12. Pushprajgarh Tahsil	53 "

Density and Forest Areas.

Districts.	Area.	Reserved Forest Area in sq. mile.	Percentage of Reserved Forest Area to Total Area.	Percentage of Kacha Am Jungle and non-Cultivable Area.	Percentage of Culturable Area to Total Area.	Percentage of Net Cultivated Area to Total Area.	Density.
Rewa State	13,000	2,859	22%	28%	50%	32%	140
North District . . .	3,515	227	7%	18%	77%	47%	213
East District . . .	3,927	1,114	28%	36%	36%	21%	108
South District . . .	5,558	1,518	28%	35%	37%	28%	116

The above table shows that density is in proportion to the percentage of cultivable area to the total area. The area of Reserved Forest is 22 per cent in Rewa State. In addition to the Reserved Forest, there is Kacha Am jungle around and near the villages, for the village 'Nistar', providing ample pasture for the village cattle.

Variation in Cultivated Area during the Decade :—The table below shows that during the decade the percentage of cultivated area to the total area has increased by about 8 per cent and the net cultivated area has increased by 7.36 per cent which shows that with the increase of the population the net cultivated area has also increased in a satisfactory proportion.

	1941.	1931.	Variation.
Percentage of cultivable area to total Area ..	50	49.2	.8
Percentage of net cultivated area to total Area ..	32	24.64	7.36

Area under various Crops :—The Subsidiary table No. 1 (1) gives the percentage of cultivated area under various crops. It shows that PADDY and KODAU nearly cover 40 per cent to 50 per cent of the total cultivated area. In addition to Paddy and Kodau, Wheat and Juar are mostly produced in the Northern District, and Oil-seeds in the Southern District, and Barley in the Eastern District. Cotton is not grown in any appreciable area in any Tahsil, and so is Sugar-cane. Commercial and Money-bringing Crops seem to be generally neglected.

The Table below gives the percentage of irrigated area to the total cultivated area. The percentage for the State is only 45. Irrigation from canals or from reservoirs is not known in the State. The irrigated area mainly consists of irrigation from wells in Teonthar Tahsil (2) and in other Tahsils in growing Vegetables for local consumption and for growing Sugar-cane for chewing.

Natural Divisions.	Percentage of Irrigated area to the total cultivated area.

Soil and System of Agriculture :—In Rewa State four kinds of Soil are found, viz., (1) The BLACK-COTTON SOIL locally known as MAIR, MATYARI or MARWA. (2) The YELLOW SANDY SOIL known as SIGON or SEHRA. (3) An ADMIXTURE of these two SOILS locally known as DOMAT and (4) The RED GRAVEL known as BHATA or BAGAR.

DISTRICTS.	Area in sq. mile.	Area of Mair and Domat cultivable in Acres.	Area in Acres of Sigon cultivable.	Area in Acres of Red Bhata cultivable.	Area in Acres of Embanked fields in all kinds of soils.	Density.
1	2	3	4	5	6	7
NORTH	3,575	2,83,215	2,52,396	1,38,914	99,490	214
EAST	3,927	22,509	1,61,984	1,56,447	47,949	108
SOUTH	5,558	1,14,174	1,85,266	2,71,175	50,641	116

From the table above it will be seen that Blackish Soils preponderate in North Rewa District and that the East District is very poor in cultivable area of Blackish Soil. Similarly the Sigon Area is the highest in the North District.

Generally, two crops in the year are grown. Just after the first heavy shower at the break of the monsoon, the fields are lightly ploughed for the Kharif or the rainy season crops, viz., Rice, Kodau, Juar and Arahar. Rice is sown in three ways in Rewa State. First by scattering the seed wide. This produces a poor coarse crop, secondly by first allowing the water to accumulate in the embanked field, then by ploughing the field in knee deep water and sowing the sprouted seed after draining out the water and thirdly by growing the Rice plant in a nursery near a well or a pool and then transplanting the 6 to 12 inch high plants carefully in the embanked fields, this produces the best crops of good quality Rice and the yield is profitable. Rice is grown in a yellowish soil generally; Kodau, Juar, and Arahar is alternated with wheat. In October the Raby Crops, viz., wheat, barley, grain, linseed are sown.

Irrigation by canals is unknown in the State. Irrigation from wells is negligible and is done only by Kachhis in growing vegetables and tobacco round the towns. An old system of irrigation is common here. The depressions and brooks are embanked and water is allowed to accumulate on the field from July to October, and then in October water is drained off by cutting the embankment at a certain point every year and then it is closed again before the next rains. When water is drained off wheat generally is sown in these embanked fields which are locally known as Bandhs. They are of from 2 acres cultivated area to 200 cultivated acres. The cost of embankment varies from Rs. 50 to Rs. 20,000. Total area of such fields is given in table above in column 6.

LAND REVENUE SYSTEM.

There is the RYOTWARI-SYSTEM of Land Tenure in the State. All the villages in the State were regularly surveyed and settled under H. Bomford, Esq., I.C.S., C.I.E., Settlement Commissioner during 1921-28. The tenants of all the villages (except the Major Illaqas) were given Pattas for their holdings by the Settlement Dept. During the decade the Rewa Land Revenue and Tenancy Code was sanctioned by the Durbar in 1934. In compliance with the provision of the Land Revenue Code, pattas were distributed in the

villages of the Major Illaqa also. All the tenants now enjoy security of tenancies. As long as they pay the rent fixed in their Pattas, they cannot be ejected without the institution of formal proceedings in the State Courts. There can be no enhancement during the period of the Settlement. The tenants are allowed rights of improvement and rights of transfer of their improved land. During the decade a Land Records Department has been established and Patwaries have been appointed in groups of villages to prepare the yearly village papers. The Land Revenue in Khothar or unalienated villages is realised from the tenants by the Patwari who are regular paid servants of the State. The Patwaries deposit the money in village accounts in the Tahsil. The Pawaidars of the alienated villages realise the rents from the tenants and pay revenue in the Tahsils. They are all liable to pay from 25 per cent. to 55 per cent. of the total rentals. All the Pawais except Jagirs are heritable and transferable. The tenants of Kothar and Pawai villages have equal rights. All exactions above the rents have been declared illegal.

VILLAGES.

It is only in Teonthar Tahsil that villages had a permanent site. In other Tahsils the villages used to change sites after every 10 to 15 years according to very old custom prevailing in the State from ancient times, with a view to increase the fertility of the soil. The abandoned village site increased in fertility. The system, after the last Settlement, has been made optional, and now few villages have changed their sites during the last 20 years. As a result of the old system, except in market towns there is hardly any brick or permanent structure which can be older than 20 or 30 years. Corrugated iron sheets are not to be seen except on the roofs of a very limited number of shops near the Railway Stations. Houses in villages do not stand in rows. The houses have mud walls and tiled or thatched roofs. Generally a house consists of two or three structures 10 to 15 feet long and 6 to 9 feet wide, of mud walls and tiled roof, and a courtyard between them. One of them is used as a kitchen, the other as a cattle-shed and the third as a sleeping room. In front of the house generally there is a Katcha well and an enclosure of split bamboo frames for sitting and sleeping in the open. A village consists of such a group of houses unsystematically built all round. There is cowdung and dirtiness all over the village. In the Northern District there are generally one or two tanks in every village. But they have not been kept in good repair. In the Eastern and Southern Districts there are few tanks; the wells, the springs and the streams are the sources of water supply for men and cattle in the villages. The water level in the wells is from 20 to 40 feet. Except in the valleys, wells have to be dug through rocks. Villages of the Gonds and other Tribal communities are very dirty, as these people store cowdung in the courtyard of their houses and keep pigs and fowls in their houses. Gonds generally make their houses on hill-tops and slopes. Tribal people near the forests, instead of making mud walls for a house, fix wooden poles in the ground and then weave split green bamboo between the poles, and then plaster the bamboo weaving with mud. They are supposed to be stronger walls than the mud walls.

Village Roads and Bullock-carts :—There are no roads from one village to the other as are found in the U.P. or the Punjab as the tenants do not keep bullock-carts. Pack animals are used to carry the produce of the fields, to the houses or to the markets. Agricultural bullocks or buffaloes or ponies of the traders are used as pack animals. Traders with their pack animals visit the villages at harvest and purchase the produce of the fields. Camels are only kept by big zamindars in very small numbers. Elephants, horses, ponies and palanquins are used as means of travel by those who can afford them. Where there are roads buses have begun to run. Near the pucca roads in the Northern district a few bullock-carts have begun to be used during the last two decades in bringing imported

articles such as salt, kerosine oil and cloth from the railway stations to the interior markets on the road. The Gonds of the Southern District use a small bullock-cart with solid wheels of about one foot diameter in which they put a big bamboo basket for carrying a load of one or two maunds. The driver has to walk by the bullock cart.

Live-Stock :—In 1911 a Census of live-stock was also taken synchronous with the cattle Census in British India. The figures of the cattle Census are as follows :—

Live-Stock Figures for 1911.

	State Total	Description	North Rewa.	East Rewa.	South Rewa.
	4,563	Bulls	284	1,522	1,999
	5,96,700	Bull Cows	2,57,101	1,47,857	2,99,692

	150	Donkeys	70	22	78
	311	Camels	282	22	7
	26,717	Carts	3,508	212	20,987
	2,32,665	Ploughs	79,303	61,469	91,893

MEANS OF COMMUNICATION.

The Great Indian Peninsula Railway touches the western boundary of the State at Satna, Jaitwara, Dabhaura and Shankargarh and passes through the State for a distance of about 18 miles. Satna is the Railway Station for Rewa, the capital of the State. The B. N. Rly. branch line from Katni to Bilaspur passes right through the Southern District of the State for a distance of 128 miles, including the C.I.C. Rly. from Anuppur. The total mileage of the Railway line through the State is 156 miles.

Roads :—The Northern District has a sufficiently wide network of roads. Rewa is now connected by metalled roads to Satna (31 miles), Allahabad (76 miles), Mirzapur (96 miles) and by fair weather roads to Dabhaura (46 miles), (via Sirmaur), to Umaria (100 miles), to Amarkantak (148 miles) (via Shahdol), and Waidhan (Singrauli) (129 miles). Satna is connected with Amarpatan (20 miles), and Semaria (30 miles), Nowgong (100 miles) and Kothi (14 miles).

During the last decade great improvement has been made in road construction by Durbar. Deosar and Singrauli Tahsils of the Eastern District where wheel traffic was unknown and which had not a single mile of road of any kind have been connected by road with Rewa and buses have begun to run from Rewa once a week. During the decade a beautiful bridge has been constructed at Dia Pipar on the Son on Rewa Shahdol road. At five other places pantoon-bridges or ferries have been established on the Son which runs through Pushprajgarh, Sohagpur, Beohari, Bandhogarh, Gopad Banas and Deosar Tahsils of the State. The liberal road construction programme has been a great boon to the people of the Eastern and Southern Districts. In spite of it there is still a pressing need in these districts for further extension of roads and of making them useful all the year round. A permanent bridge on the Son to connect Rewa with Sidhi the headquarters of the Eastern District, and bridging of nallas on the road to Singrauli, making the Singrauli road pucca and new roads between Gurh to Chorahat, Mauganj to Sidhi, Majhoul to Waidhan, Hinauti to Khatai, Bargawan to Khatai and Jiyawan to Sarai are the pressing needs of the Eastern District. The following table shows the extension of roads during the decade :—

	1921	1931	1941
Metalled Roads miles	208	267	449
Fairweather Roads miles	211	377	655
Total miles	419	644	1,104

Occupied Houses:—The number of occupied Houses in 1941 is 3,57,733 as compared to 3,15,005 in 1931. A house, according to the Census Code of 1941, for Census purposes is defined as :— (i) Any structure other than a dwelling house, as a tent pavilion, Temple, Serai, etc., or a site, camping ground, Ghat, etc. to which a separate number has been affixed. (ii) The dwelling place of one commensal family with its dependents and resident servants having an independent entrance, whether that entrance be from a road, gallery, balcony, corridor, court-yard or otherwise. The number of houses per 100 sq. miles in 1941 was 2,752 as compared with 2,423 houses per 100 sq. miles in 1931—which shows that number of houses per 100 sq. miles has increased by 329. The number of persons per house in 1941 has been disclosed to be 5.09 as compared with 5.04 persons per houses in 1931.

Variation:—Of Population during the last 50 years.

Reference:—Imperial Table No. 2. Subsidiary Table No. 2 (i).

The Census of 1941 has disclosed an increase of 2,33,000 persons in the population of Rewa State over the 1931 figure which is an increase of 14.7 per cent. The area of the State has remained unchanged. The following Table gives the Census figures for Rewa State from 1891 to 1941. As compared to 1891 there is an increase of 3,12,265 or 37 per cent :—

Year.	Population.
1911	18,20,115
1931	15,87,115
1921	11,01,521
1911	15,15,237
1901	13,27,181
1891	15,03,180

The population of Males in 1941 was 9,13,672 as compared with 7,95,381 in 1931 which shows an increase of 1,18,291 in Male population during the decade. The Table below gives the figures of the Male population in Rewa State from 1891 to 1941. Compared to 1891 there is an increase of 1,55,256 in the Male population of the State in 1941 :—

Year.						Male Population.
1941	9,13,672
1931	7,95,381
1921	6,98,322
1911	7,52,554
1901	6,59,488
1891	7,58,416

The population of Females in 1941 was 9,06,773 as compared with 7,92,064 in 1931 which shows an increase of 1,14,709 in the Female population of the State during the decade. The following Table gives the figures of the Female population for the years 1891 to 1941. There is an increase of 1,57,009 in Female population of the State from 1891 to 1941.

Year.						Female Population.
1941	9,06,773
1931	7,92,064
1921	7,03,202
1911	7,62,683
1901	6,67,696
1891	7,49,761

The following Table gives the Variation in Density per square mile in Rewa State from 1891 to 1941. In 1941 it is 140 per square mile as compared with 117 in 1911.

Rewa State.	1941.	1931.	1921.	1911.
REWA STATE	140	122	108	117

Towns and Villages.

*Reference :—*Imperial Tables No. *iii*, *iv* and *v*.
Subsidiary Tables No. 3/1, 4/1,
4/2, 5/1, 5/2.

The population of 18,20,445 persons as disclosed in the Census of 1941 is distributed among 6,483 inhabited villages, 8 Towns and 1 City. A village is a collection of dwelling houses of persons generally engaged in agricultural occupations or in occupation related or subservient thereto. A village generally consists of hamlets or 'Tolas' or a group of houses within the village. A village for the Census purposes is the same well recognised unit as a village for the Revenue Administration. There has been a regular Survey and Settlement of the State in the period 1921-1928. So a Revenue village was taken as a village for the Census. A town for the Census purposes is defined as a collection of houses inhabited by at least 5,000 persons or places with even a less population but having urban characteristic or Municipalities, Cantonments and Civil Stations.

The following Table shows that the number of inhabited villages has increased by 17 during the decade. The number of villages with population ranging from 500 to 1,000 has increased by 182, the number of villages with populations between 1,000 and 2,000 has increased by 30. The number of villages between 2,000 and 5,000 has increased by 17, and the number of Towns between 5,000 and 10,000 has increased by 1.

Populations.								Number of Villages and Towns.		Variation in number.
								1941.	1931.	
1.	1,00,000 and over	Nil.	Nil.	Nil.
2.	Between 50,000	..	1,00,000	Nil.	Nil.	Nil.
3.	..	20,000	..	50,000	1	1	Nil.
4.	..	10,000	..	20,000	1	1	Nil.
5.	..	5,000	..	10,000	2	1	+ 1
6.	..	2,000	..	5,000	38	21	+ 17
7.	..	1,000	..	2,000	159	129	+ 30
8.	..	500	..	1,000	730	548	+182
9.	Under 500	5,552	5,765	—213
								6,483	6,466	+ 17

Towns :—The number of places treated as Towns or Cities in the Census of 1941 is 10 against 9 in 1931. The Table below gives the population of these in 1941 and 1931 and the Variation during the decade :—

Cities and Towns.					Population in		Variation.	Percentage of Increase or Decrease.
					1941.	1931.		
1.	Rewa City	26,008	25,206	+ 802	+ 4 %
2.	Satna Town	11,575	11,176	+ 399	+ 3 %
3.	Umaria	6,842	7,614	— 772	— 10 %
4.	Sahdol	6,753	2,123	+4,630	+218 %
5.	Amarpatan	2,700	2,383	+ 317	+ 13 %
6.	Jaitahari	3,267	2,775	+ 492	+ 17 %
7.	Govindgarh	3,787	3,790	— 3	— 07 %
8.	Dhanpuri	3,059	2,563	+ 496	+ 19 %
9.	Hanumana	1,456	926	+ 530	+ 57 %
					65,447	58,556	+6,891	+ 11·7%

Rewa City:—The Capital of the State, was treated as a city in the reports of 1921 and 1931, though according to the Census Code the minimum population of a City is 1,00,000. It has shown an increase in population of only 4 per cent in the decade. The sex ratio is 797 females per thousand males. Density per sq. mile is 2,451 and literacy among males is 39 per cent and among females is 8 per cent.

The population of Rewa City consists of 20,681 Hindus, 5,164 Musalmans, 23 Christians, 119 Jains and 21 Sikhs. The table below shows the population of 1941 and the percentage of increase during the decade of some of the Cities in India :—

Cities.	Population of 1941.	Percentage of increase during the decade.
1. Indore	2,03,343	38%
2. Gwalior	1,82,000	14%
3. Hyderabad	7,28,000	56%
4. Bhopal	75,182	23%
5. Ratlam	45,187	20%
6. Jaipur	1,75,000	17%
7. Bikaner	1,27,000	18%
8. Jodhpur	1,26,000	33%
9. Jubbulpore	1,78,000	13%
10. Allahabad	2,60,000	11%

Satna is on the Railway Line between Allahabad and Jubbulpore and is the nearest Railway Station for Rewa City from which it is 31 miles and is connected with a Pucca Road. It is the chief exporting and importing market for Rewa and the neighbouring States of Baghelkhand and Bundelkhand. It has a high school, a hospital, railway-workshop and electricity. It is the Headquarters of Raghurajnagar Tahsil. The population has increased by 3 per cent during the decade. The sex ratio is 886 females per 1,000 males. The total population consists of 9,429 Hindus, 1,778 Musalmans, 79 Christians, 262 Jains, 14 Sikhs and 13 of other castes.

Umaria is a Railway Station on the B.N. Railway between Katni and Bilaspur. It is the Headquarters of Bandhogarh Tahsil in South Rewa District. It has Coal-Mines and a Shellac-Factory. Its population has gone down during the decade on account of the reduced working of the Coal-Mines due to poor demand of Umaria Coal. The sex ratio is 962 females per 1,000 males. The total population consists of 5,964 Hindus, 830 Musalmans, 16 Christians and 32 Jains.

Sahdol another Railway Station midway between Katni and Bilaspur on the B. N. Rly. Its population has more than trebled. It is the Head-quarters of the Southern Rewa District and Sohagpur Tahsil. It is also the residence of the Thakur of Sohagpur. It is a growing trade centre and facilities of communication to the interior of the State from Sahdol will further improve the Town. The total population of the Town consists of 5,345 Hindus, 1,175 Musalmans, 144 Christians, 87 Jains and 2 Sikhs.

Amarpatan is an important ancient town on the Great-Deccan Road between Maihar and Rewa. It is an exporting trade centre for Beohari and Raghurajnagar Tahsils of the State. Its population consists of 2,162 Hindus, 438 Musalmans and 100 Jains.

Jaitahari and Dhanpuri are market Towns on the B. N. Rly. Line between Katni and Bilaspur. Jaitahari has shown an increase of 17 per cent during the decade. Its population consists of 3,119 Hindus, 104 Musalmans and 44 Jains. Dhanpuri has shown an increase of 19 per cent. Its population consists of 2,837 Hindus, 221 Musalmans and 1 Jain.

Govindgarh is the Monsoon Residence of His Highness Maharaja-Sahib Bahadur. Its population has slightly decreased during the decade. Its population consists of 3,458 Hindus and 329 Musalmans.

Hanumana is a growing trading Town on the Great-Deccan Road about 40 miles west of Mirzapur. It is the exporting and importing market for Eastern Rewa district. Its population has increased about 60 per cent during the decade. Its population consists of 1,406 Hindus and 50 Musalmans.

There are Municipal committees of nominated official and non-official members in Rewa, Satna, Umaria and Sahdol, with official chairman and the local doctor as health officer.

Urban Population :—The total Urban Population in Rewa State in the Census of 1941 was 65,447 which is only 3.5 per cent of the total population of the State. In the 1931 Census the Urban Population was 58,556 which means that the total Urban Population of the State has increased by 11.7 per cent during the decade. Since 1891 the total Urban Population of the State has increased by 59.4 per cent. In India as a whole the Urban Population has increased by 81 per cent during the last decade. In the Urban Areas in Rewa State the population of Females per 1,000 Males is 880.

BIRTH-PLACE

*Reference :—*Imperial Table No. vi.

Subsidiary Table No. 6/2.

In enumeration the birth-place of every person is recorded from which the number of persons born outside the State but enumerated within the State is known. This figure gives some idea of the migration from one Province or Country to the other. It cannot give any correct idea as at the time of the census enumeration some of them might have been travelling through the State, and their presence here on a particular date might have been recorded within Rewa State. Similarly many others might have been busy sight-seeing or might have come here to attend a relative's marriage and were enumerated here on account of their presence in the State. Some might have been within the State temporarily for the purpose of grazing their cattle, serving in the collieries or in the collection of forest produce, or some might have been working here in a semi-permanent way, for trade or service and last of all some persons may have migrated from outside the State and settled here. Expectant mothers generally go to their mother's houses for child-birth.

From figures based on the birth-place record, which consists of the above-mentioned six types, it is difficult to find out the ratio of the types or persons who might have permanently migrated to Rewa State.

The total population of the State is 18,20,445 persons. The number of persons enumerated in the same Tahsil in which they were born is 17,11,925 which means that

94 per cent of the population belongs to the Tahsils where they were born. 57,892 persons have migrated from one Tahsil of Rewa State to another, which means that 3 per cent of the population left the places of their birth but have remained within the State. The number of persons who have been enumerated within the State but who were born outside is 51,528 *i.e.*, 3 per cent. This figure consists of all the types of persons explained in the above para.

The Table below will show the number of persons who were born in the bordering States and Districts and were enumerated within the Rewa State. The total of such persons was 43,535 which is 85 per cent of the total number of the persons born outside :—

Neighbouring States or Districts.	Population.
1. Panna	2,000
2. Nagod	3,176
3. Sohawal	2,593
4. Maihar	2,812
5. Kothi	1,217
6. Ajaigarh	296
7. Chhatarpur	301
8. Jaso	33
9. Raigaun	11

Singrauli Tahsil	3,323	1,709	1,614	3	2	1
Beohari Tahsil	2,351	633	1,718	13	7	6
Bandhogarh Tahsil ..	3,900	1,061	2,839	222	124	98	3	2	1
Sohagpur Tahsil	9,582	4,526	5,056	627	362	265	1	1	..
Pushprajgarh Tahsil ..	3,272	1,078	2,194	8	6	2

From the above Table Raghurajnagar Tahsil seems to have the largest number of persons from the neighbouring States and District. Then comes Sohagpur with extensive forest with 9,582 persons from the neighbouring Districts and States. Teonthar is the third having 6,830 persons from the neighbouring Districts and States. Then come Bandhogarh with 3,900, Singrauli with 3,323, Pushprajgarh with 3,272, Hazur Tahsil with 2,980, Deoasar with 2,443 and Beohari with 2,351.

Figures of persons born in Rewa State but enumerated in other Provinces or States were not available.

AGE

Reference :—Imperial Table No. vii.

Subsidiary Table No. 7/1, 7/2, 7/3, 7/4, 7/5, 7/6, 7/7, 7/8 and 7/9.

It may be pointed out that Age Statistics provided by the Census are not expected to be absolutely accurate. Few persons remember their ages accurately and nobody cares to declare his age to the enumerator with any correctness. Aborigines, backward classes, villagers and illiterate people seldom have any correct idea about their ages. The entries about age may be regarded as approximate. This is no special feature for Rewa State but

it is the same everywhere. The instructions to the enumerator were "Enter the age in years and months on the first day of March 1941; if precise date of birth unknown state approximate age in years only. In the cases of infants of less than one year old write 0 for year and give the number of months. The Table below gives the number of total population and Males and Females enumerated in the various age groups. The largest number 2,87,274 are of age group : 5 years to 10 years and the lowest 14,022 are in the age group : 65-70.

Age-group.	PERSONS.		
	Persons.	Male.	Female.
0—1	18,703	9,638	9,065
1—2	51,595	25,639	25,956
2—3	57,371	27,241	30,130
3—4	69,531	32,909	36,622
4—5	62,331	30,520	31,811
5—10	2,59,531	1,25,947	1,33,587
10—15	2,12,221	1,13,962	98,262
15—20	1,46,099	79,393	66,706
20—25	1,40,290	74,903	74,387
25—30	1,72,550	82,850	89,700
30—35	1,61,516	76,264	78,252
35—40	1,25,143	67,941	63,207
40—45	85,102	42,601	43,501
45—50	73,749	36,112	37,637
50—55	51,629	25,373	26,256
55—60	43,570	20,320	23,250
60—65	28,279	13,632	15,243
65—70	14,022	6,504	7,718
70 and over	10,325	7,232	3,193
Total	7,22,445	3,63,472	3,58,973

Nearly half (3,58,973) of the total population of the group of below 20 years and 2,02,474, namely one-third of the total population, are between the ages 20 to 40. If taken the ages 20 to 40 the number of Males is 2,05,922 and the number of Females is 2,05,552.

1941.		1931.		1921.		1911.	
Age-group.	Total.	Age-group.	Total.	Age-group.	Total.	Age-group.	Total.
0-10 ..	5,46,808	0-10 ..	4,57,746	0-10 ..	3,96,394	0-10 ..	4,51,991
10-20 ..	3,58,323	10-20 ..	3,36,335	10-20 ..	3,03,861	10-20 ..	2,69,319
20-30 ..	3,21,820	20-30 ..	2,95,319	20-30 ..	2,16,075	20-30 ..	2,75,615
30-40 ..	2,79,664	30-40 ..	2,27,115	30-40 ..	2,36,929	30-40 ..	2,30,937
40-50 ..	1,59,801	40-50 ..	1,45,685	40-50 ..	1,81,191	40 and over.	2,86,981
50-60 ..	95,199	50-60 ..	79,316	50 and above.	1,36,138		
60-70 ..	42,302						
70 and over.	16,428						

From the above Table it may be seen that the new addition to the total population during the last decade is the figure 5,46,808 of the age group 0-10. By comparing the population of the age period 0-10 of the year 1941, 1931, 1921 and 1911 we find that the figure for 1941 is nearly 19 per cent more than the corresponding figure of 1931, which appears to be a wholesome feature of the growing population. Similarly the number in the age-groups 60-70 and 70 & over is higher by 23 per cent and 30 per cent respectively more than the corresponding figure for 1931, which shows that the longevity and with it the average expectation of life has increased which is another satisfactory and commendable feature.

Mean-Age or the average age of the population for the Rewa State in the 1941 Census as calculated in Subsidiary Table No. 7/1 is 23.25 for Males and 24 for Females as compared with 22.53 and 23.2 respectively for 1931 which shows a longer average span of life in 1941 than in 1931. It is interesting to note that the Mean-Age in Rewa State differs in the various Tahsils according to the climatic and economic conditions of the Tahsils. The Table below shows that Hazur Tahsil which is the Tahsil round about the Capital Town Rewa, and which has the advantage of enjoying better, than other Tahsils, the amenities of life, viz. Educational, Medical, Economical, etc. which are possible in the State, has the highest Mean-Age of 24.15 for Males and 25.40 for Females. Deosar Tahsil which is the most backward Tahsil in the State as having very bad climate and only about 17 miles of fair weather road having no hospital and no market town has the lowest Mean-Age in the State 21.00 for Males and 22.80 for Females.

Tahsils.	Mean-Age in 1941.	
	Males.	Females.
Rewa-State	23.25	24
1. Hazur Tahsil	24.15	25.40
2. Raghurajnagar	24.05	25.10
3. Teonthar	23.30	23.95
4. Sirmaur	23.53	25
5. Mauganj	22.77	24
6. Gopad-Banas	22.65	23.55
7. Deosar	21.00	22.80
8. Singrauli	22.30	22.70
9. Beohari	23.30	24.10
10. Bandhogarh	22.85	23.50
11. Sohagpur	23.80	23.45
12. Pushprajgarh	23.10	23.60

If we take a group of 10,000 persons from the population as constituted on 1st March 1941 and find out the number of persons of the various age-groups in the different communities we may be able to compare the effects of the social conditions of a community on age. Subsidiary Table No. 7/2 gives the information in detail for the year 1941, 1931, 1921, and 1911.

Longevity :—The following Table shows that the number of persons per 1,000 Males and Females both attaining ages over 60 is the highest among the Jains, then come the Muslims, then Hindus and then the Tribal classes.

Number per 10,000 of the Population.

Age-group.	Jains.		Muslims.		Hindus.		Tribal Classes.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
60—65 ..	184	254	160	184	112	169	138	146
65—70 ..	123	229	73	88	69	86	60	65
70 and over ..	92	152	88	105	79	103	70	79

It may be said that the social and economic conditions among the Jains are the best as compared with those of all the other communities, as a large number of persons among them reach the ages of 60 and 70. Literacy, as may be seen under chapter of literacy, is the highest among the Jains, generally they all live in Towns and pursue trades where there are the least dangers to life. Then their economic condition is good and medical aid is always at their service. The tribal classes are at the opposite end in every item detailed above and the longevity among them is the least of all.

The number of children between the ages 0 to 10 in all the four communities in group of 10,000 are as follows :—

Number of Children per 1,000 of the Population between 0—10.

Communities.				Totals.	Males.	Females.
1.	Hindus	6,973	2,978	2,995
2.	Muslims	5,976	2,964	3,012
3.	Jains	5,259	2,704	2,555
4.	Tribals	7,607	3,282	3,325

The fecundity among the Tribals is the greatest then come the Hindus and then the Muslims. Jains are the last in this respect.

Sex :—In the Census of 1941 the male population exceeded the female population in the State as was also the case in 1931, 1921 and 1911. The following table (subsidiary table 7/6) shows the variation between the two sexes in the last seven Censuses.

Years.	Males.	Females.
1941 ..	2,15,372	2,06,779
1931 ..	2,26,181	2,22,714
1921 ..	2,28,144	2,31,712
1911 ..	2,12,574	2,22,713
1901 ..	2,13,688	2,17,713
1891 ..	2,28,410	2,12,714
1881 ..	2,14,142	2,06,714

Part B, Table (from Imperial Table No. vii) shows that in 1941 the number of males up to the age of 5. Above the age of 5 the number of females till the age of 25. After the age of 25 the number of males is more than the females. This suggests that the birth of the females is in excess of the males up to the age of 5. After the age of 5 the males seem to be a greater favourite than the females, and are the recipient of better care and attention in the family. This is especially true after the age of 25 when the girl becomes the manager in her husband's household and her own destiny. After the age of 25 the women are better off than the men as they are exposed to less risks as compared with men in the struggle for existence. The excess of females over the males up to the age of 5 proves that the old system of infanticide said to be prevailing among the higher castes in the State and the practice of sati is extinct now :—

Age Group	Male.	Female.
0-1	9,633	9,065
1-2	25,539	25,956
2-3	27,241	30,130
3-4	32,909	36,623
4-5	30,520	31,814
5-6	1,25,947	1,33,587
6-7	1,47,155	1,39,816
7-8	1,13,963	98,262
8-9	79,393	66,706
9-10	74,903	74,387
10-11	82,630	89,700
11-12	76,264	78,252
12-13	61,941	63,207
13-14	42,601	43,501
14-15	36,112	37,687
15-16	25,373	26,256
16-17	20,320	23,250
17-18	13,032	15,248
18-19	6,304	7,718
19-20	7,232	9,196
20 and over	9,13,673	9,06,773

Hindus forming 92 per cent. of the Population, the remarks above for the whole State apply perfectly well for the figures among the Hindus, (Subsidiary Table No. 7/7). Among the Muslims who are 2 per cent. of the population the number of females is greater than the males in the age-group of 0 to 5 and again above the age of 45. Among the Baigas, Panikas and the Pabs, the most backward tribes who are 5 per cent. of the population the number of females is more than that of the males in the age-group 0 to 5 and 20 to 40 and again at above 60. Among the Jains the females are more than the males in the age-group, 1 to 5 and 25 to 35 and above 60 years.

In Sirmaur, Pushprajgarh, Raghurajnagar, Hazur and Mauganj Tahsils, the number of females exceeds the number of males. In Gopat Banas the two sexes are equal in numbers. In Teonthar the number of females per 1,000 males is the least, being only 935.

CIVIL CONDITION.

Reference :—Imperial Table No. vii.

Instructions to the enumerators about recording entries *re:* married, widowed and divorced were simple in this Census. They were required to make their entries according to the general significance of the terms as they might be told by the persons or the head of the family enumerated. All those who are regarded married according to the general custom or social condition were recorded as married.

Marriage is universal in Rewa State as everywhere else in India. Marriage generally takes place earlier in Rewa State and it is regarded as the most important religious ceremony in the life of a person. It is generally arranged by the parents among the Hindus, the Jains and the Musalmans. The bridegroom with his relations goes to the home of the bride where the religious ceremonies are performed under the guidance of a Brahmin or a Qazi and after staying there from 2 to 4 days and feasting at the cost of bride's household returns generally with the bride, who returns to her father's house within the week. Again according to the age of the bride either within the year or within 3 to 5 years another ceremony is performed which is known locally as Sudin or Gawna in which the bridegroom again goes to the bride's home with a smaller party this time and after staying from one to two days brings the bride. Dowry is still as common as it ever was among the Brahmins, the Baniyas, the Rajputs and the Kayasthas. During the last decade the "Child Marriage Prevention Act" has been enacted by the Durbar on the lines of the Sharda Act of British India. There has been hardly any prosecution of the infringement of the Act. The general conditions have a tendency to raise the age of marriage among all the castes.

Among the Gonds the Ghar-Jamai System of marriage is also prevalent in which the would-be bridegroom, on the invitation of the bride's parents, goes to the bride's home and stays there from 3 to 5 years and works there and then he settles separately either in the bride's village or returns with the bride and settles in his own village with his father. Among the Panikas, Pabs and other tribes including the Gonds, the young people in the villages at the occasion of the Full-moon in spring or summer dance the KĀRMA Dances in which all women and men of the village take part, make friendships and disappear on the night of the dance and after staying for two or three days, in the jungle return and they are received in the village as a married couple; and then drinking, feasting and offerings of sacrifices to the ghosts of their dead are observed and then after staying for sometime in the parent's household the bridegroom sets up his separate household.

Marriage is limited within the castes and its sub-divisions:

Among the caste-Hindus it is the religious duty of a father to find out a suitable match for his growing daughter and he tries his best to give his daughter to a family in the highest sub-division of his caste and for this favour he has to pay a dowry to the bridegroom's

tather. The education of the boy or his future prospect in obtaining a State Service or inheriting a Zamindari or other possibilities of future good prospects increase the amount of dowry demanded by the bridegroom's father. According to the religious belief and customs Hindus even other than Brahmins, Rajputs and Baniyas also regard it a religious duty and social necessity to give ornaments, clothing, food-grain, utensils, cows, buffaloes and bullocks in dowry to the bridegroom and his father. No divorce or widow marriage is allowed among the caste-Hindus. Among the lower caste Hindus and the tribes divorce and widow-marriage are common. The caste PANCHAYATS among them after inflicting 'Kodai-Bhaji' or a feast to the caste people formally recognise the marital relation of a divorced or widowed women with any man of their own caste, or taking in of a woman of another caste as a wife by any one in the caste.

Among the tribal people polygamy is common but among the Hindus and Musalmans it is found in exceptional cases though there is no religious bar to it.

Formerly the State in its Khalsa villages and the Land-owners in their Zamindari villages used to realise a tax known as 'BOKRA-PICHHOURA' (in cash Rs. 12/8) in each case and the Land-owners used to realise an additional tax known as 'NIPTAMAN' according to the status of the person from a person who used to take as his wife any woman divorced or widowed or a woman of a different caste. The realisation of 'BOKRA-PICH-HOURA' tax during the last decade has been declared illegal by the Durbar.

A 'DAIJAWAN' (DOWRY) tax used to be realised by the State and the Land-owners to meet the expenses of the marriage of a daughter in the ruling family or in the Land-owner's family. The DAIJAWAN-TAX has also been abolished by the Durbar during the last decade.

A glance at the Imperial Table No. 7 for the State will show the ridiculous fact of the Indian population that 52 Males and 89 Females are recorded as married under one year of age, and 37 Males and 20 Females under one year of age are recorded as widowed; and 8 Males and 4 Females below the age of 5 are recorded as divorced. Higher figures are also recorded under these headings from one year's age-group to fifteen years' age-group. The total of married persons below 15 years' age is 49,490 Males and 70,406 Females, and the number of widows of under 15 years' age is 4,057. There is no speciality in these figures for Rewa State; conditions may be worse in other parts of India.

Civil Condition of the Age-group 0-15 Years.

MARRIED.			WIDOWED.			DIVORCED.		
Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.
119,896	49,490	70,406	7,222	3,165	4,057	214	118	196

Unmarried:—From Table 7 it may be seen that the number of Unmarried Males is the highest at the age-group 5-10 and for the Females at the age-group 0-5. After these groups, the figures decrease and at the age-group 15-20 the number of both married boys and girls is higher than of unmarried ones. After this age the number of married Males and Females is greater than the number of unmarried Males and Females.

Married:—The number of married Males is the highest at the age of 25-30 and the number of Females married is also the highest at the age of 25-30. In 1931 the highest number of married Females was found in the age-group 20-25.

Marriageable Age.—This shows that the marriageable age of females is slightly rising. In 1931, out of the total population of girls up to the age of 10, a little over 16 per cent. were recorded as married; but in 1941 of the number of married girls as compared to the total population of the girls up to the age of 10, only 10 per cent. have been recorded as married. Similarly the percentage of married girls to the total population of girls in 1931 up to the age of 5 was 5 per cent. while in 1941 the percentage was 2.5 per cent. This shows that the marriageable age of girls in Rewa State has risen during the decade and is a very laudable sign in the well-being of the society.

Similarly, in 1941 the percentage of married boys to the total population of the boys up to the age of 15 years is only 13 per cent. while the same was 17 per cent. in 1931, and similarly the percentage of the married boys to the total population of the boys up to the age of 10 in 1941 is only 6.7 per cent. while the same in 1931 was 10 per cent.

The Table below gives the number of married persons in age-group 0-15 per 1,000 of each sex of selected communities. Among Telis about $\frac{1}{3}$ of the children are married before the age of 15. Kurmis are the next to marry their children early, before the age of 15. Then come the Chamars, Ahirs or Kachies to marry their children early. Least number married per 1,000 before the age of 15 is to be found among the Bahgels and Parihars Rajputs. Gonds and Baigas are after the Baghels and the Parihars but they are better in this respect than other castes. Sarvariya Brahmins are after the Baghels, Parihars, Gonds and Baigas in this respect.

Community.	Married per 1,000 in the age-group 0-15.	
	Males.	Females.
1. Ahir	168	263
2. Baniya	128	204
3. Sarvariya	83	160
4. Chamar	200	281
5. Kachhi	153	225
6. Kol	112	160
7. Kurmi	224	278
8. Baghel	29	46
9. Parihar	27	61
10. Rathaur	136	253
11. Teli	281	369
12. Gond	61	109
13. Baiga	36	70
14. Muslim	104	163

The percentage of unmarried Males and Females to the total population of each sex in the various age-groups above 25 is as follows :—

Age-group.	Males.	Females.
25—30	10%	.9%
30—35	6%	.7%
35—40	4%	.6%
40—45	4%	.7%
45—50	3%	.8%
50—55	3%	.8%
55—60	3%	.8%
60—65	3%	.7%
65—70	3%	.8%
70 and over	7%	1.4%

From this Table it appears that while Females above the age of 25 up to 70 are only from .6 per cent. to .9 per cent. unmarried, Males are unmarried from 10 per cent. in the age-group of 25-30 and 6 per cent. in age-group 30-35. From the Subsidiary Table No. 7/9 the percentage of unmarried Males in the age-group 30-40 to the total population of the sex in the same age-group in some communities is as following :—

Ahirs 3 per cent., Baniyas 5 per cent., Sarvariya 15 per cent., Chamars 2 per cent., Kachhis 3 per cent., Kol 1 per cent., Kunbis 6 per cent., Baghels 10 per cent., Parihars 8 per cent., Rathours 2 per cent., Gonds 2 per cent., Telis 2 per cent., Baigas 2 per cent. and Muslims 5 per cent.

Widows :—The Table below gives the number of widows in the State in the various age-groups for the State and the main communities. The percentages in the age-group 20-30 of widows in some communities are as follows :—

Ahir 5 per cent., Baniya 9 per cent., Sarvariya 13 per cent., Chamar 3 per cent., Kachhi 5 per cent., Kol 3 per cent., Kurmi 5 per cent., Baghel 8 per cent., Parihar 11 per cent., Rathaur 4 per cent., Gond 4 per cent., Teli 4 per cent., Baiga 3 per cent. and Muslim 5 per cent :—

Age-group.	All.	Hindus.	Muslims.	Jains.	Tribes.
0—5	881	670	58	8	145
5—10	1,678	1,435	79	3	161
10—15	1,498	1,314	56	3	95
15—20	1,786	1,673	40	*	73
20—25	3,474	3,296	67	4	106
25—30	6,488	6,157	111	5	215
30—35	8,856	8,428	158	3	267
35—40	13,010	12,246	256	6	502
40—45	12,790	12,024	258	7	499
45—50	16,870	15,799	385	11	672

CHAPTER II.—Occupational.

OCCUPATION.

Reference :—Imperial Table No. viii(i), viii(ii).

Subsidiary Table No. 8/1—8/7.

Imperial Table No. ix, x(i), x(ii).

Means of livelihood, in order of importance, was inquired in Question No. 14 of the slip from such persons as are workers. Those who are partly or wholly dependent on others are recorded as such in reply to Question No. 9, and the means of livelihood of the person on whom one is wholly or partly dependent is recorded in reply to Question No. 10.

The total population of the State in the Census of 1941 was 18,20,445 (Males 9,13,672, Females 9,06,773). Among these 9,24,894 (Males 3,38,509 and Females 5,86,385) are recorded either as totally dependent on others or as non-workers. These include children, women and all such persons as do not earn their living by themselves but are wholly dependent on others' earnings. The population of Males up to the age of 10 in the State is 2,73,405 and the population of Males above the age of 55 is 46,888. The total of these comes to 3,20,293 which is nearly equal to the total number of dependent males. Population of Females up to the age of 15 is 3,71,665 and the population of Females above the age of 40 is 1,62,856. The total of these comes to 5,34,521.

Number of persons recorded as partly dependent is 3,30,806 (Males 1,28,469 and Females 2,01,337). Along with these figures the number of boys between the age of 10 and 15 is 1,13,962 which is worth consideration. Among the females the total population between the ages of 15 and 40 is 3,72,252, and out of these 3,30,806 are recorded as partly earning their living and partly dependent on others' earnings. Members of the household who help the head of the family by doing some work in the field or by way of grazing cattle or by way of helping the artisan father or husband may come in the category of those who partly earn their living.

In most of the village occupations such as pasture and agriculture, cultivation of special crops and hand crafts, the whole family is found engaged, except small children. The occupation is inherited for generations in the family, so the whole family throughout the year as may be possible by the trade is customarily engaged in that trade. If he is an agriculturist, children above 6 and 7 years of age graze the cattle, women milk the cows, cook the food, clean and keep the house, look after the young cattle, do the weeding, watering, winnowing or cutting of the crops, according to the season, in the fields; in off-season whatever time is snatched from the household work is utilised in digging and depositing earth on the old embankments of the fields, or in repairing the houses. An artisan's wife and children give all their time in pushing up the family trade. The head of the family is really the manager of the whole organisation of the family trade, and he, among the village people or among the working classes, does not allow any member of the family to sit idle but exacts as much work from every member of the family as he can. So, all those who are recorded as partly dependents should be regarded as actual earners. They are only dependent for advice and guidance, as a labourer is to a manager in a factory. They have no separate home and as members of the family they regard themselves as dependent on the head of the family though as far as the earning is concerned they give their full mite towards earning the family fund under the guidance of the head of the family.

The number of persons engaged^a wholly in a trade are recorded as 5,16,022 (4,08,037 Males and 1,07,985 Females). The number of persons having subsidiary occupations, but are as much earners as above is recorded as 44,120 (Males 33,752, Females 10,368). The number of persons recorded as partly dependent, as shown above, are 3,30,806 (Males 1,28,469 and Females 2,01,337). So the total number of persons who work for their living are 8,90,948 (Males 5,70,258 and Females 3,19,690). Nearly 49 per cent. of the population of the State are earners and 51 per cent. of the population are totally dependents.

Occupations for the Census tabulation have been first divided into four classes, viz., A. Production of Raw Material. B. Production of and Supply of Industrial Material Substances. C. Liberal Arts and D. Miscellaneous. Every group is then divided into sub-classes, viz., A. Production of Raw Material is divided into sub-classes 1. Exploitation of Animals and Vegetation (pasture and agriculture, cultivation of special crops, poultry, stock raising and fishing, etc.). 2. Exploitation of Minerals. Class B. Production and Supply of Industrial Materials is sub-divided into:—1. Industry (Textile, Hides, Wood, Metal, Food, Dress, Furniture, Building). 2. Transport (Air, Water, Road, Post-Office). 3. Trade (Bank, Trade in Textile, Skins, Wood, Metals, Food-Stuffs, Clothing, Building Material, Hotel, etc.). Class C. Liberal Arts are sub-divided into:—1. Public Forces (Army, Navy, Air Force, Police, etc.). 2. Public Administration (State Servants, Indian State Servants, Municipal and Village Officials). 3. Professions and Liberal Arts (Priests, Monks, Servant in Religion, Lawyers, Medical Practitioners, Teachers, and Professors, Architects, Sculptors, Astronomers, Astrologers, Scientists, Authors, Journalists, etc.). Class D. Miscellaneous (Beggars, Inmates of Jails, Unspecified, and Unproductive Occupations).

Imperial Table *viii* Part 1 and 2 and its Subsidiary Tables give very detailed information about the number of persons employed wholly or partly in the 235 occupations classified in the list. The following table gives important details of class A.

Occupation.	Actual workers.	Persons who do not work and are dependent totally on workers.	Totals.	Percentage of the total Population.
1. Proprietors taking rents (non-cultivating) ..	2,742	4,842	7,570
2. Tenant cultivators	5,56,365	6,30,200	11,86,565
3. Agricultural labourers	1,91,647	1,40,951	3,32,598
4. Pan (special crop) growers	752	1,719	2,471
5. Market gardeners, flower and fruit growers ..	663*	505	1,168
6. Forest produce collectors	954	777	1,731
7. Breeders and keepers of cattles	13	21	34
8. Herdsmen, shepherds and breeders of other animals	12,101	9,037	21,138
9. Lac cultivation	1,138	1,200	2,338
10. Fishing	135	59	294
11. Hunting	3	*	3
	15,55,890	85.4%

The table above shows that 85 per cent of the total population of the State subsists by exploitation of animals and vegetation. The number of tenant cultivators is 5,56,365 and the number of non-working dependents is 6,30,200, which means that the total population of 11,86,565 lives by cultivation. The number of actual workers as agricultural labourers is 1,91,647 and their non-working dependents are 1,40,951. Landed proprietors collecting rent and not cultivating land with their non-working dependents number 7,570.

In 1941 the population living by the exploitation of animals and vegetation is found to be 85.4 per cent while in 1931 it was 87 per cent and in 1921 it was 79.3 per cent. It seems that the pressure on agriculture has decreased by 1.6 per cent since 1931.

In the exploitation of minerals, the total number of persons engaged and dependents upon them are 887. The only minerals worked in the State are coal in the Southern district and corundum in the Eastern district.

Industry:—The following table gives the list of industries in Rewa State and the number of persons working in them and their non-working dependents:—

Industries.	Actual workers.	Non-working dependents.
1. Cotton ginning, spinning, weaving, rope making, dyeing, calico-printing, lace embroideries making	2,533	1,735
2. Wool weaving	291	265
3. Making boots and shoes	6,103	4,952
4. Making other leather articles	2,895	2,928
5. Wood-articles makers, sawyers, carpenters	2,411	1,795
6. Basket makers	7,607	6,441
7. Workers in iron smelters and blacksmith	4,619	4,973
8. Worker in brass, copper, bronze and bell-metal.	186	289
9. Worker in other metals except precious metals	541	247
10. Potters and brick makers	6,447	6,035
11. Glass bangles makers	329	406
12. Fireworks makers	104	195
13. Vegetable oil makers and refiners	4,801	4,115
14. Soap perfumes makers	26	35
15. Drugs and chemical manufacturers	10	22
16. Shellac and lac articles manufacturers	513	518
17. Grain purchasers	444	553
18. Butchers	177	314
19. Brewers and distillers	286	223
20. Others	655	670
21. Tailors	2,322	2,957
22. Washing and cleaning	365	373
23. Hair dressing and cutting (barbers)	3,318	3,539
24. Lime burners, well sinkers, stone cutters, masons, house builders	2,528	3,265
25. Motor and Cycle repairers	16	26
26. Electric machinery repairers	44	54
27. Bookbinders	11	10
28. Makers of musical instruments	30	78
29. Watch makers and repairers	18	24
30. Makers of jewellery and ornaments and precious stones	3,048	4,559
31. Coach builders, toy makers and others	108	94
Total ..	52,745	51,685

The total number of persons who work in the above industries is 52,745 and their non-working dependents are 51,685. The total population who live by the industries in the State is 1,04,430 which is 5.7 per cent of the total population of the State.

In 1931 5.3 per cent of the population was living by industry and in 1941 5.7 per cent of the population of the State lives by industry. During the decade the population of the State has increased 14.7 per cent while the increase in the population supported by the industrial occupations is only .4 per cent.

Improvement in the means of communications, facilities of transport, free and liberal and patronising atmosphere for the encouragement of investments in the industrial organisations may lead to the development of industries in the State. For the growing population new occupations are necessary to provide living for the new growth otherwise the pressure on the existing means of livelihood will increase and it may lead to emigration of the able bodied persons or to the further lowering of the already low standard of living of the people of the State.

Transport :—The following table will show that 2,632 persons are the workers and 3,737 are their non-working dependents, totalling 6,369 in the Transport Industry. The percentage of the total number of persons living on the Transport Industry to the total population of the State is .3 per cent. In 1931 the percentage was .6 per cent. In 1931 the construction work of the Central India Coal Field Railway from Anupore within the State was in its last stage so the percentage was large as compared to 1941 :—

	Occupations.	Actual workers.	Non-working dependents.
1	Boat-workers	30	16
2	Persons employed in road construction, including labourers	114	106
3	Palki bearers, pack-animal drivers	6	22
4	Railway employees other than coolies	2,073	2,872
5	Labourers employed in Railway construction	133	142
6	Post Office, Telegraph, Telephone services	109	203
7	Porters and messengers	167	376
		2,632	3,737

Trade :—The following table gives the number of persons living in occupations classified under trade :—

	Occupations.	Actual workers.	Non-working dependents.
1	Trade in piece-goods, etc.	1,313	2,376
2	Trade in wood (not firewood)	374	143
3	Vendors of wine, liquor, etc.	466	366
4	Dealers in flour and pulses	3,475	4,322
5	Dealers in sweetmeats, sugar and spices	1,494	1,244
6	Dealers in dairy products, eggs and poultry	2,435	2,605
7	Dealers in fodder	810	511
8	Dealers in fruits and vegetables	2,863	3,347
9	Dealers in other food stuffs	8,202	10,451
10	Dealers and hirers of carts, carriages, elephants, horses, bullocks, donkeys, etc.	460	700
11	Dealers in firewood	401	429
12	Dealers in bangles	1,067	383
13	Itinerant traders	1,535	1,849
14	Publishers, booksellers, stationers	10	19
15	Other traders	874	1,336
		25,779	30,481

The total population living on trade is 56,260. There are 25,779 workers and 30,481 non-working dependents. The percentage of the number of persons living on trade to the total population of the State comes to 3 per cent. In 1931 it was 2.4 per cent. So there is an increase of .6 per cent during the decade.

Public Force and Public Administration :—There are 9,848 persons in army, police and administration ; and 10,556 persons are their dependents. The total is 20,404, which is 1.1 per cent of the total population of the State. In 1931 it was .9 per cent, there is an increase of .2 per cent.

Liberal arts which include occupations connected with religion, medicine, law, education, painting, architecture, music, etc., provide work for 1,539 persons. There are 2,034 non-working dependents. The total number of persons depending in this group of occupation is 3,573 or .2 per cent of the total population of the State. In 1931 the percentage was .3 per cent.

There are 196 persons with 13 persons as partly dependent and 345 totally dependent on them, living on their own income derived from funds, scholarships and pensions. In 1931 the figures were 165-7-68 respectively.

In Domestic service 611 persons have been recorded as working persons and 7,932 are recorded as their non-working dependents. The total number of persons living on this branch of occupation is 14,049 which is .7 per cent of the total population of the State. In 1931 the percentage was 1.1 per cent.

In insufficiently described occupations 22,221 persons have been recorded as working persons, and 23,202 persons have been recorded as non-working dependents. The total is 45,423 which is 2.5 per cent of the total population of the State. In 1931 it was 1.3 per cent.

In the unproductive occupations such as inmates of jails and asylums, or beggars, vagrants, etc., the total recorded is 10,698 which is .6 per cent of the total population of the State. In 1931 they were .9 per cent of the total population of the State.

The following table gives the percentage of population in the various classes of occupations in 1941 and 1931 :—

Class of occupations.	Percentage of the total population in	
	1941.	1931.
Agriculture	85.5	87
Minerals1	.3
Industry	5.8	5.3
Transport3	.6
Trade	3.00	2.4
Public force and public administration	1.1	.9
Liberal arts3	.3
Domestic service8	1.1
Insufficiently described, occupations	2.5	1.3
Unproductive6	.9
	100.00	100.00

Industries :—Ref. Imperial Table No. IX gives the list of Industries in Rewa State. They are as follows :—

Name.					Total population engaged as directional and supervising staff and as operators.
1	Bidi Factories	347
2	Electric Work	25
3	Lime Trade	1
4	Motor Works	8
5	Wine Bhatties	4
6	Oil Mill	1
7	Flour Mill	1
8	Wood-workers	11
9	Cement Works	1
10	Shellac Factory	20
11	Coal Mines	561
					980

There are no big factories. There are Coal Mines at Umaria and Burhar. There is a Shellac Factory at Umaria and there are Bidi Factories at Rewa and Satna. Electric Power Houses are at Rewa, Satna and Umaria. The Lime Works are at Satna. The total number of persons engaged in the above works as directional and supervising staff and as operators are 980.

Unemployment :—Imperial Table X, Part 1, gives figures of unemployed persons. Total number of persons recorded as unemployed is 254 out of whom 106 have been recorded as being unemployed for less than one year and 148 have been recorded as unemployed for more than one year. The distribution of unemployed according to Tahsil and districts is as follows :—

Natural Divisions.					Total.
REWA STATE					254
Northern District					173
1. Hazoor Tahsil					Nil.
2. Raghurajnagar					15
3. Teonthar					41
4. Sirmaur					Nil.
5. Mauganj					117
Southern District					71
1. Beohari					17
2. Bandhogarh					11
3. Sohagpur					43
4. Pushprajgarh					Nil.
Eastern District					10
1. Gopad-Banas					10
2. Deosar					Nil.
3. Singrauli					Nil.

The problem of unemployment is not acute at present in Rewa State. All the educated people are absorbed in the State service at present. The general desire among the people to have their children educated, the increased facilities of education, and the absence of an opening for the educated, except the State service, will make the problem of unemployment worthy of notice in the next decade.

Educated Unemployed :—Imperial Table X, Part 2, gives the number of educated unemployed. Three Graduates four Intermediates, one Matriculate and three Hindi Middle passed are recorded as unemployed in Raghurajnagar Tahsil.

One graduate in Oriental language is recorded as unemployed in Bandhogarh Tahsil. No educated person has been recorded as unemployed in any other Tahsil.

CHAPTER III.—Cultural.

LITERACY.

Reference :—Imperial Table No. XI.

Subsidiary Table No. 11/1 to
11/6.

Literacy for the purpose of Census was defined as the ability to read and write. In the Census of 1911 in the total population of Rewa State of 18,20,445 the number of literates returned is 84,172. This shows the percentage of literates to the total population of the State to be 4.62 per cent.

The Table below gives the percentage of literates to the total population of India as a whole and of certain Indian Provinces and States. Among the British Provinces Bombay has 30 per cent literates in its population. Among the States Travancore has 48 per cent literate population. Gwalior has 7 per cent, Indore 13 per cent, Bhopal has 6 per cent, Rewa has 4.62 per cent, Panna has 4.3 per cent, Orchha 4.4 per cent, Datia has 7.5 per cent and Central India Agency as a whole has 8 per cent literate population.

1. India	12.17
2. Provinces	12.51
3. States	11.09
4. Punjab	13
5. U. P.	8
6. Bombay	30
7. C. P.	11
8. Hyderabad	7
9. Baroda	23
10. Cochin	35
11. Gwalior	7
12. Kashmere	7
13. Travancore	48
14. C. I. Agency	8
15. Rewa	4.62
16. Indore	13
17. Bhopal	6
18. Panna	4.3
19. Orchha	4.4
20. Datia	7.5

Percentage of literates in the total population in 1931 was 2.7 per cent. In 1941 the percentage of literates in Rewa State has reached 4.62 per cent. So, from 1931 to 1941 the increase achieved is 71 per cent. The Table below gives the increase in literacy from 1931 to 1941 in some of the Provinces and States. In India as a whole there is an increase of 70 per cent, in U. P. it is 80 per cent, in Bombay it is 100 per cent, in Indore State the increase is 44 per cent and in Bhopal State it is 100 per cent. The increase in literacy in Rewa State during the decade is the outcome of His Highness's liberal educational policy and the increasing of educational institutions in the State.

Province or State.	Percentage of increase in literacy from 1931 to 1941.
1. Rewa State	71%
2. U. P.	80%
3. Bombay	100%
4. Indore State	44%
5. Bhopal	100%

In the Census of 1941 the total number of Females in the State was 9,06,773. The number of literates among them was 4,314. So the percentage of literacy among Females in Rewa State is 0.5 per cent. In the Census of 1931 the percentage of literacy among Females was only 0.3 per cent. So during the decade there is an increase of 66 per cent in the literacy among Females in Rewa State.

Literacy according to Administrative Division:—The table below gives the figure of the total population and number of literates in each District and Tahsil. Hazoor Tahsil and Raghurajnagar both have 8 per cent literate population. Pushprajgarh has only 1 per cent literate population and Deosar and Singrauli both have 2 per cent literates. Gopad-Banas and Sohagpur Tahsil have 3 per cent and Bandhogarh has 4 per cent literate population.

Name of Districts and Tahsils.	Total Population.	Number of Literates.	Literacy Percentage.
North-District	7,50,478	48,843	7
1. Hazoor Tahsil	1,93,808	15,872	8
2. Raghurajnagar	1,45,431	11,525	8
3. Sirmaur	1,43,725	7,571	5
4. Teonthar	1,09,417	6,227	6
5. Mauganj	1,58,097	7,648	5
South-District	6,45,808	23,594	4
1. Beohari	1,55,611	7,053	5
2. Bandhogarh	1,21,189	5,376	4
3. Sohagpur	3,10,697	10,690	3
4. Pushprajgarh	58,311	475	1
East-District	4,24,159	11,735	3
1. Gopad-Banas	2,48,829	8,534	3
2. Deosar	1,00,019	1,970	2
3. Singrauli	75,311	1,231	2
REWA-STATE	18,20,445	84,172	5

Literacy in Urban areas in Rewa State :—Shahdol the growing town and the headquarters of District South Rewa has the unique distinction of having one out of every four of its inhabitants literate. This is the highest percentage of literacy recorded in any town or Tahsil in Rewa State. Rewa City and Satna have 22 per cent of their inhabitants literate. Then comes the town of Umaria and Govindgarh with 16 per cent and 14 per cent respectively of their population as literates.

City or Town.	Population in 1911.	Number of literates in 1911.	Literacy Percentage.
1. Rewa City	26,008	5,753	22%
2. Satna	11,575	2,556	22%
3. Shahdol	6,753	1,683	25%
4. Umaria	6,812	1,068	16%
5. Govindgarh	3,787	530	14%

Literacy in Rural areas :—The following Table gives the population of Hazoor Tahsil less of Rewa City and Govindgarh and similarly of Raghurajnagar Tahsil and Sohagpur Tahsil and Bandhogarh Tahsil less the population of Satna, Umaria and Shahdol towns respectively and the corresponding figures of literate population :—

Tahsil and District.	Population of Rural Area.	Literates in Rural Area.	Percentage of Literates.
North-District	7,09,108	10,001	6
1. Hazoor Tahsil	1,61,013	9,589	6
2. Raghurajnagar	1,33,856	8,969	7
3. Sirmaur	1,43,725	7,571	5
4. Teonthar	1,09,117	6,227	6
5. Mauganj	1,58,097	7,648	5
South-District	6,32,213	20,843	3
1. Beohari	1,55,611	7,053	5
2. Bandhogarh	1,14,347	4,308	4
3. Sohagpur	3,03,944	9,007	3
4. Pushprajgarh	58,311	475	1
East-District	4,24,159	11,735	3
1. Gopad-Banas	2,48,829	8,534	3
2. Deosar	1,00,019	1,970	2
3. Singrauli	75,311	1,231	2

The following Table gives the percentage of literacy according to religions. Jains have the highest percentage of literates among them, and Tribes who form about $\frac{1}{3}$ of the total population of the State have only 0.3 per cent literates.

Religion.	Population.	Literates.	Percentage.
Hindus	11,21,312	77,863	5%
Muslims	39,011	4,483	11%
Jains	1,212	571	46%
Sikhs	63	15	22%
Christians	274	186	68%
Tribes (Gond, Baiga, Panika, Pab Bharia, etc.)	3,58,592	1,015	0.3%

The following Table gives the percentage of literacy among Males in selected communities. The highest percentage of literacy, 48 per cent is among the Kayasthas, then come the Jains with 46 per cent, the Agrawal Baniyas with 40 per cent, Baghel Rajputs with 22 per cent, Parihar Rajputs with 21 per cent, Kesar Baniyas and Kasaundhan Baniyas with 19 per cent, Sarvaria Brahmins and Pathans with 14 per cent. Gonds, Kols, Chamars, Ahirs, Baigas, Telis Panikas and Kachhis who together form nearly half the population of the State, have literacy among them from .05 per cent to .1 per cent. The Ghasiyas, the Dharkars, and the Majhis, have no literates among them :—

Community.	Total Population.	Number of Literates.	Percentage of Literates in the Community.
1. Sarvarias	2,70,095	38,266	14%
2. Gond	2,31,298	861	0.4%
3. Kols	2,03,509	92	0.05%
4. Chamar	1,17,172	59	0.05%
5. Kunbis	1,09,436	3,012	3%
6. Ahir	76,856	210	0.3%
7. Baiga	51,423	32	0.1%
8. Teli	60,926	446	1%
9. Kachhi	50,833	574	1%
10. Panika	30,687	56	0.2%
11. Baghel	19,140	4,137	22%
12. Sheikh	11,972	1,322	11%
13. Kesar Bani	11,212	2,139	19%
14. Kayastha	7,218	3,438	48%
15. Pathan	6,882	950	14%
16. Parihar	6,426	1,351	21%
17. Rathors	5,595	165	3%
18. Domar	2,926	11	0.4%
19. Agrawal	2,336	941	40%
20. Kasaundhan	1,387	269	19%
21. Jains	1,242	571	46%
22. Ghasiya	982
23. Dharkar	5,790
24. Majhi	984

The following Table gives the percentage of literacy among Females in selected communities. Jains have 25 per cent, the largest percentage of women literates, among them, Kayasthas have 20 per cent women literate. Then come Sayyids (Muslims) and Agrawals with 10 per cent, Parihars with 6 per cent, Baghels with 5 per cent, and Sarvaria Brahman with 1 per cent. The remaining communities have less or nil.

Community.	Percentage of literacy among Females.
1. Jain	25%
2. Kayastha	20%
3. Sayyid	10%
4. Agrawal	10%
5. Parihar	6%

Literates in English :—The Table below gives the figures for English education in the Districts and Tahsils. In Rewa State 2 per cent are literates in English. In Hazoor Tahsil the percentage of the English educated is the highest being 1 per cent. In Teonthar Tahsil it is 04 per cent, in Singrauli 5 per cent, in Raghurajnagar 5 per cent, Pushprajgarh Tahsil could not record even one per cent as literate in English :—

District and Tahsil.	Total Population.	Number of Literates in English.	Percentage of English Literates in Total Population.
REWA STATE	18,20,445	3,235	0·2
North-District	7,50,478	2,316	0·3
1. Hazoor Tahsil	1,93,808	1,451	1·00
2. Raghurajnagar	1,45,431	757	0·5
3. Sirmaur	1,43,725	31	0·02
4. Teonthar	1,09,417	47	0·04
5. Mauganj	1,58,097	37	0·02
South-District	6,45,808	829	0·1
1. Beohari	1,55,611	41	0·03
2. Bandhogarh	1,21,189	160	0·1
3. Sohagpur	3,10,697	628	0·2
4. Pushprajgarh	58,311
East-District	4,24,159	90	0·02
1. Gopad-Banas	2,48,820	68	0·03
2. Deosar	1,00,019	18	0·02
3. Singrauli	75,311	4	0·005

Subsidiary Table No. 116 gives the number of Institutions and Pupils in 1941, in Rewa State. The following Table gives the number of Institutions and the Pupils in 1941, 1931 and 1921 :—

Institutions.	1941 No. of Institutes.	Pupil.	1931 No. of Institutes.	Pupil.	1921 No. of Institutes.	Pupil.
Intermediate College	1	2,291	2	950	2	550
English High Schools	3					
Anglo-Vernacular Middle School	3					
Vernacular Education—						
Hindi Middle Schools	31	7,885	23	5,879
Hindi Lower Middle Schools.	144	9,611	134	6,917	92	545
Oriental Studies—						
Vedic School	1	50	1	23	2	41
Sanskrit Pathshalas	4	126
Vocational School	1	147	5	203
Training Schools	2	38	1	15
Total	190	20,168	165	13,935	102	2,595

The above Table shows that great progress has been made in the number of institutions and the number of pupils during the decade. An Intermediate College, a Girls' High School, one Anglo-Vernacular Middle School, eight Hindi Middle Schools and ten Lower Middle Schools have been newly opened during the decade. The number of pupils has increased by 134 per cent. in the English Schools and by 37 per cent. in the Hindi Schools.

The Table below gives the percentage of school-going Children (age 5-15) attending schools in Rewa State and the number of sq. miles served by one school.

District and Tahsil.	Population between the age (5-15).	Area in sq. miles.	Number of Educational Institutions.	Number of Pupils.	Sq. mile served by one School.	Percentage of the School going age (5-15) population in Schools.
REWA STATE	4,99,498	13,000	190	20,168	68	4%
North-District—						
1. Hazoor Tahsil	50,174	621	41	4,538	15	9%
2. Raghurajnagar	37,095	645	25	2,429	25	7%
3. Mauganj	48,726	889	13	1,703	60	4%
4. Simaur	38,619	550	15	2,355	36	6%
5. Teenhar	32,917	800	14	1,271	37	4%
South-District—						
1. Beohari	43,234	1,120	15	1,413	70	3%
2. Bandhogarh	33,540	1,201	10	702	129	2%
3. Sahagpur	86,223	2,475	15	1,355	165	1%
4. Pushprajgarh	16,590	672	5	387	134	2%
East-District—						
1. Gopad-Banas	70,751	1,594	22	2,312	72	3%
2. Deesr	25,936	1,718	10	423	171	1%
3. Singrauli	75,311	615	4	330	153	0.4%

The above Table shows that in Singrauli Tahsil out of every 250 children of the school-going age (5-15) only one is schooling. In Sohagpur and Deosar Tahsils one out of every 100 boys is schooling. In Pandhargarh and Pushprajgarh out of every 100 boys 2 attend school. Gopaldihari and Beohari have 3 out of every 100 boys are schooling. Maungaj and Panchhat have 4 boys out of every 100 going to school. Out of every 100 boys Surmaul has 6, Kachhargarh has 7 and Hazoor Tahsil has 9 boys attending school.

In Panchhat Tahsil a school on an average, serves an area of 171 sq. miles. In Sohagpur there is one school for every 103 sq. miles. In Singrauli there is a school for every 181 sq. miles. In Pandhargarh and Bundelgarh Tahsils there is a school for every 121 and 126 sq. miles respectively. Gopaldihari and Beohari Tahsils have a school for every 72 and 69 sq. miles respectively. In the Tahsil of the Northern District, Maungaj is smaller than the other Tahsils. It has a school to serve the needs of the population living in every 61 sq. miles of its area.

In Pandhargarh there is a school for every 37 sq. miles, and Surmaul has a school for every 26 sq. miles. Kachhargarh has a school for every 26 sq. miles, and Hazoor Tahsil has a school for every 25 sq. miles. More schools are needed, especially in the Tahsils of Bundelkhand, Kachhargarh, and Hazoor for more than an area of 100 to 171 sq. miles. A Primary school should be established to serve the needs of people beyond 20 to 25 sq. miles.

and vii/3.

Tables Nos. 11, 12 and 13 of Part 17 and 18 of the Slip Mother-tongue and other languages spoken by the enumerated person. In the case of the mother-tongue, the mother-tongue of the mother was entered. Imperial Table 12, Part 17, gives the names of the population about the mother-tongue and Imperial Table Part 18, gives the names of the language in common use in addition to the mother-tongue.

The following Table will show that 11,19,457 people or 77.8 per cent of the total population of the United Provinces (Bundelkhandi and 4,02,488 or 22.1 per cent, people of the United Provinces speak Gondi. The speakers of other languages are only 2,4,400.

No. of Tahsils	Number of people speaking the Mother-tongue.	Percentage of the total population.
1. Bundelkhandi	11,19,457	77.8%
2. Bundelkhandi	2,827	
3. Gondi	4,02,488	22.1%
4. Other Languages	1,800	1%

The following table will show the number of persons speaking the various mother-tongues in the State. English is returned as mother-tongue of 147 persons. Bundelkhandi is returned as mother-tongue of 2,827 persons. Bengali is returned as mother-tongue of 521 persons. Marathi of 335 persons and Hindi of 144

persons Gujarati of 129. Punjabi of 140. Bhili, Kanjari, Beldari languages which were returned in 1931 are not returned in 1941 Census at all.

Name of Language.						Number of persons, speaking.
1.	Baghelkandi (Hindi)	14,13,338
2.	Bundelkandi (Hindi)	2,827

Pushprajgarh Tahsil			25.00	75.00

Bi-Lingualism :—Among the persons speaking Baghelkhandi as their mother tongue a very small number have returned other provincial languages such as Rajashthani, Bengali, Marathi, Punjabi, Telegu or Gujarati as the other common language spoken by them. Their number is not above 50. The details may be seen in Imperial Table No. 12 Part (2). Among the persons recorded as having Gondi as their mother tongue 10,037 have returned Baghelkhandi as the second common language spoken by them.

The chief language spoken in Rewa State is Hindi Baghelkhandi. It is classified as a dialect of Eastern Hindi which is a mediate sub-branch of the Indo-European family group of languages. There is little difference in Baghelkhandi, Bundelkhandi, Hindustani, Awadhi and Brij Bhasha. Anybody knowing any one of them can very well talk to one who may be knowing any other of the above which are all forms of Eastern Hindi.

Hindi is the common language of the State. The spread of education and the ever increasing contact of the people of the interior of the State with those living near or in the Capital and the increasing facilities of pilgrimage to Allahabad, Benares and Chitrakut (Dist. Banda U. P.) have a tendency to change the old accents of the dialect and to introduce words and accents of Hindustani or Hindi or Khari Boli. All published books and newspapers and the Hindi books in the curriculum of the primary schools of the State are in Khari-Boli Hindi. The influence of these factors is that the common language of the State is becoming Hindustani or Hindi. Tribal people are coming in contact more and more with the people of the Northern District or with the people living near the Railway stations of the Southern District and so they, too, with pride, like to speak the common language of the State: the Baghelkhandi Hindi. Nearly ten thousand of them have returned Baghelkhandi as the second common language used by them. Gondi is only a spoken language; it is not written so it is possible that as education spreads Gondi will disappear and the language of the printed books will take the place of the old spoken language.

COMMUNITIES AND THEIR DISTRIBUTION.

Reference :—Imperial Table *xiii*

Subsidiary Table 13/1, 13/2, 13/3.

Imperial Table *xiv*

The total population of the State, 18,20,445, is made up of several communities. The table below will show the population of the important communities.

Community.	Population.	Percentage to the total Population.
Hindus	16,78,496	92%
Tribes	1,01,308	5%
Muslims	39,044	2%
Indian Christians	110	1%
Anglo Indians	106	
Europeans and Armenians	28	
Sikhs	68	
Jain	1,242	
Parsis	6	
Jews	7	

The Tribal people coming in contact with the rest of Hindus more and more every day are adopting Hindu ways and customs and religious observations. Well to do Gonds for example have begun to call themselves Rajputs. They have begun to put on the sacred thread commonly put on by the Brahmans, Kshatriyas and Vaishyas. In the marriages they now take the help of Brahman astrologers and Brahman priests.

There are no conversions from one religion to another in the State.

Muslims are a progressive community. Their number is increasing in the towns. They are very successful as itinerant vendors, P.W.D. contractors, weavers and petty traders. They have courage and are ready to take risks. Musalmans in the State are very considerate of the feelings of their Hindu neighbours. But outside influences, specially near the Railway Stations, are changing the old conditions, and Musalmans are adopting the ways of living, in matters of dress, and strict religious observances according to outside practices and observances.

In Tahsil Singrauli, the Jaiswars, Kalars and Telies are a progressive people. Their contact with their brothers in Mirsapur, their neighbouring district, is helping them to adopt more and more the Hindu ways of living. They are acquiring Zamidaries and are well-to-do money-lenders and traders. They have begun to wear the sacred thread and have begun to adopt names with the suffix of 'Singh', which were common to Rajput names only. Similarly Bargahis, Paiks and Bhurtiyas are slowly adopting a consciousness of being higher than the cultivating classes and they try to assert themselves as being somewhere near to Rajputs.

Lunias, Darzis, Kachers, Malies, Singrahas, Barais and Sonars do not allow themselves to be treated as 'Shudras'. Sonar, Lonia, Barai and Mali have in some places taken to putting on the sacred thread and they try to be recognised among the trading classes and the Banias.

The castes which were regarded as untouchable in the past are gradually becoming touchables. The Kumhars Badhai, Bharbhunja, Dhobi, Kotwar, Majhi, Murha, and Chamar are all touchable now. The list of untouchables is gradually shortening. The Domars (Sweepers) are the only class who are still commonly regarded as untouchables and there appears to be no change in the attitude of the Hindus towards them. Education, facilities of travelling, cheap cloth and wide introduction of sewing machines in villages is tending to break the strong partitions of the caste system. The time-old differences of "high" and "low" are collapsing. The blind faith in religious observances is also disappearing though very imperceptibly. Education in future will have an equalising effect on the population in general.

Common prejudices against widow marriage, inter-caste marriages and inter-caste dinners continue as of old, but the prejudice against female education is fast disappearing.

Distribution of main communities in the Tahsils and the Districts :—

The total number of Muslims in the State is 39,044. More than half of them (20,046) are in the Northern District and nearly one-fourth (10,888) are in the South District, and the remaining, less than one-fourth (8,110) are in the East District. In the Northern District (8,679) nearly half of the total population of the Muslims in the District is in Hazoor Tahsil. Second largest number 4,874, is in Gopad-Banas. Mauganj has 3,818 and Raghurajnagar has 3,777.

The table below gives the figures for all the Tahsils :—

Tahsils.	Total Population.	Muslim Population.		
		Males.	Females.	Percentage to the total Population of the Tahsils.
Rewa State	1,820,445	19,911	19,103	2.1%
North District	750,176	10,158	9,888	2.7%
1. Hazoor Tahsil	193,808	1,304	1,378	1.5%
2. Raghurajnagar	145,431	1,939	1,838	2.6%
3. Teonthar	109,417	866	635	1.4%
4. Sirmaur	113,725	1,133	1,138	1.6%
5. Mauganj	158,097	1,916	1,962	2.4%
East District	424,159	4,172	3,938	2%
1. Gopad-Banas	248,829	2,485	2,389	2%
2. Deosar	160,019	1,014	911	1.3%
3. Singrauli	75,311	673	635	1.7%
South District	645,808	5,611	5,277	1.7%
1. Beohari	155,611	967	921	1.2%
2. Bandhogarh	121,189	1,313	1,500	2.2%
3. Sohagpur	310,597	3,203	2,973	2%
4. Pushprajgarh	65,311	98	83	.3%

Jains :—Though the number of Jains is only 1,242 in the State they are an influential and a rich community. All of them are traders and live in towns and trading places. The table below gives their population in the Tahsils. They are not found in Tahsils where there is no railway line except in Beohari. Nearly all of them have migrated from Bundelkhand States of Panna and Ajaygarh during the last 50 years. The textile and the export trade of the State is in their hands.

Tahsil.	Population of Jains.
1. Hazoor	119
2. Raghurajnagar	363
3. Beohari	55
4. Bandhogarh	203
5. Sohagpur	502

In the Census of 1941, 140 Indian Christians, 106 Anglo-Indians and 28 Europeans or Armenians have been recorded in Rewa State. They are generally in the employ of the Railways or Collieries or in the State Service.

SIKHS AND PARSIS :—68 Sikhs and 6 Parsees were enumerated. They are traders or mechanics in railway or State employ.

Tribal Community :—The table below gives the total of the Backwards among the Tribal community. Increase among them during the decade is 27 per cent.

Among them, Baigas have shown the greatest increase. Baigas, Panikas and Pabs are still very backward and uncivilised. They mostly live in forest on wild roots, herbs and game which they get by means of the bow and arrow. They are taking to

agriculture very slowly. Their houses contain no articles. The house is made of bamboos and grass and is nothing more than a shelter against the rains. They make their houses somewhere near a watercourse. They do not possess any utensils for storing or drinking water, but walk to the stream. Employment in the collection of forest produces enables them to earn some money which they spend in heavy drinking and in purchasing salt and tobacco.

The Baiga is tall and well built with cheek-bones prominent. Baigas have not yet learnt to put on sewn clothing. They keep long hair and put on a loin cloth only. Pabs and Panikas are like the Baigas, but they are not tall and well built like the Baigas. All the tribes given in the list are found in the Southern and Eastern Districts. They are not found in the Northern District.

Tribe.	1941.	1931.	Percentage of variation during the decade.
Baiga	51,423	35,813	30%
Panika	30,687	26,815	13%
Pab	18,614	16,252	12%
	100,724	78,880	

The Depressed Classes :—The table below gives the number of people of the depressed classes. Increase among them during the decade is 18 per cent. Chamars are coming out slowly from the category of untouchables. They work as agricultural labourers along with the Kols and work as labourers in construction work and Collieries. Domars and Mehtars have no other work except scavenging or making bamboo baskets. They are not employed as labourers in agricultural work or constructional works, and they are still regarded as untouchables. Bansphores are really bamboo basket-makers but they are regarded equal to Domars and they are also regarded as untouchable as Domars.

Community.	1941.	1931.	Variation.
Chamar	117,172	97,167	17%
Domar	2,927	2,600	11%
Mehtar	1,354	1,242	9%
Bansphor	6,855	5,607	19%
	128,308	106,616	18%

Cultivating Castes :—Kunbi, Kachi, Ahir, Gond, Kalar, Gadariya, Kewat, Kori are the castes which depend on cultivation for a living. Kurmis are the best cultivators. Kalars, Kachi, Gond and Ahir follow them. They are independent tenants and grow all kinds of crops. They pay the land revenue in time. They are a progressive caste, and education is also slowly spreading among them. Their villages and houses are clean and their cattle are well looked after. Increase in their population is 11 per cent. during the last decade. They are mostly found in the Northern District and where the Gond and the Baiga are not found.

Gonds are of tribal origin. Their only occupation is agriculture. Rice and Kodon is their staple food and they grow rice in embanked fields. Backwards among them keep poultry and pigs. They are tall and well built. They use small bullock-carts in carrying produce from the fields to their houses; Kachis are intelligent cultivators and they mostly grow vegetables, spices and sugar-cane. They are generally found in the Northern District. Ahir, Kalar, Kewat, Gadariya, Kori are other cultivating classes who combine agriculture with their inherited occupations, which are for Ahirs: keeping of cows and buffaloes, for Kalars: brewing, for Kewats: plying boats, for Gadariyas: keeping sheep, and for Koris: weaving.

Community.	Population in the State in.	
	1941.	1931.
Ahir	76,856	68,375
Chamar	117,172	97,167
Gadariya.. .. .	11,365	11,852
Kachi	50,833	45,119
Kalar	21,658	18,770
Kewat	40,622	31,771
Kol	203,507	175,371
Kori	17,549	17,045
Kunbi	169,436	97,226
Gond	234,298	198,315

Agricultural Labourers:—Kols and Chamars (their population is given in the table above) are the agricultural labourers and plough the land for Brahmins and Rajputs who still do not touch the plough, in Rewa State. The Chamars and the Kols are not found as independent cultivators. They have been living up to now as agricultural serfs and used to be sold and mortgaged by one tenant to another; and used to be restored to the owner by the State Authority if they would run away. The usual price was Rs.100 for the fully working man. During the decade the State sanction for the restoration of the runaways was withdrawn and now no suits for the restoration of the possession over the 'Harwah' (Agricultural labourer) are entertained by the State Courts.

That has been the greatest humanitarian agricultural reform during the time of His Highness. They will now be able to settle down as independent tenants. Their condition is improving and more attention is paid towards the regular payment of their wages and their comforts by the owning tenant as he knows that if they run away the State will not help him and he will lose his investment over the labourer. The tendency at present is that if they feel dissatisfied with their master they run away to the industrial towns in the neighbouring British Districts instead of settling down as independent tenants, as they do not possess the necessary implements or Capital or spirit for agriculture.

SHORT NOTE ON PUBLIC HEALTH AND SANITATION OF REWA STATE DURING 1931-41.

By LT.-COL. S. N. MAKAND, I.M.S. (Ret.),

Chief Medical Officer, Public Health, Rewa State.

The Department of Health is administered by the Chief Medical Officer with a separate Health Officer and Public Health Budget.

The average annual expenditure of the Health Deptt. amounts to about Rs.45,682.

There is no separate Health Staff and health work is carried out by Medical Officers attached to Hospitals and dispensaries. A separate Health Officer was however appointed for varying periods for the town of Rewa.

Medical Officers in charge of hospitals at Satna, Umaria and Sohagpur are Health Officers of the Municipal Committees of Satna, Umaria and Shahdol.

Registration of Vital Statistics.

This has been carried out in an imperfect and half hearted manner in the town of Rewa but the figures obtained are totally unreliable. Elsewhere no action is taken.

Water supply.

Rural areas are supplied by wells, rivers, streams and tanks. No survey has been undertaken to obtain a correct idea of the existing manner and adequacy of water supply in all parts of the state.

Water is pumped up for distribution from rivers at Rewa and Umaria but it is not subjected to purification and is only suitable for ablution, watering and gardening purposes.

Conservancy service is furnished in the towns of Rewa, Satna, Umaria and Shahdol but elsewhere it is left entirely to individual. There are public latrines and trenching grounds at these four towns.

Epidemic and other diseases.

Cholera is the most important recurring epidemic. The incidence of the disease was as follows:—

Year.	Seizures.	Deaths.
1931-32	56	27
1932-33	219	57
1933-34	1,515	836
1934-35	762	470
1935-36	230	145
1936-37
1937-38	1,478	827
1938-39	884	401
1939-40	555	262
1940-41	3,215	1,917

Plague. The State remained free from Plague.

Small-pox. Statistics of morbidity and mortality are not available.

The State manufactures its own vaccine lymph. The number of persons vaccinated against small-pox is as follows :—

			Total number of persons vaccinated.
1931-32	44,343
1932-33	45,951
1933-34	45,575
1934-35	45,230
1935-36	46,911
1936-37	50,889
1937-38
1938-39	57,538
1939-40	62,664
1940-41	50,045

Rabies.

1931-32	40	dogbite cases sent to Kasauli.	
1932-33	40	..	Jubbulpore.
1933-34	37	..	Jubbulpore.
1934-35	40	..	Jubbulpore.
1935-36	40	..	Allahabad.
1936-37	57	..	Allahabad.
1937-38	41	(36 treated at Allahabad and 5 at Re centre opened at Rewa).	
1938-39	39	treated at Rewa Centre.	
1939-40	49	treated at Rewa Centre.	
1940-41	40	treated at Rewa Centre.	

Malaria is endemic in the forest areas of the south and the east. The Tahsils of Pushprajgarh, Singaroli and Deosar are particularly malarious and the majority of its inhabitants suffer from malaria and enlarged spleens.

Meteorology.

Year.	Average rainfall for the state.		Maximum temperature.	Minimum temperature.

Vol. II. TABLES

CONTENTS OF VOLUME 2.

Imperial Table No.	Subsidiary Table No.	CONTENTS OF THE TABLE.	PAGE
1.		Area, number of towns, villages, occupied houses, urban and rural population of male and female for the State, Districts and Tahsils	1
	1 (1)	Density, cultivable, double cropped and irrigated areas, rainfall and percentage of area under various crops for the State, Districts and Tahsils	2
	1 (2)	Area and Population, actual and percentage, by Tahsil and District Density ..	3
	1 (3)	Persons per 100 houses and Houses per 100 sq. miles	4
2.		Variation of population during fifty years	5, 6, 7
	2 (1)	Variation and Density	8
3.		Towns and Villages classified by population	9
	3 (1)	Distribution of the population between Towns and Villages	10
4.		Towns classified by population with variation since 1891	11, 12, 13
	4 (1)	Towns classified by population	14
	4 (2)	Figures for Cities	14
5.		Towns arranged territorially with population by communities	15
	5 (1)	Number per 1,000 of the total population and of each main community who live in towns	16
	5 (2)	Communities of urban and rural population	17
6.		Birth-place (1. Within the State. 2. In C. I. States. 3. U.P. 4. C.P. 5. Eastern States. 6. Rajputana States. 7. Other Indian States. 8. Punjab. 9. Bengal. 10. Bombay. 11. Madras. 12. Assam. 13. Bihar. 14. Orissa. 15. N. W. F. Prov. 16. Outside India. 17. Unspecified)	18-57
	6 (2)	Immigration	58
7.		Age and civil condition according to Religion and Natural Divisions	59-136
	7 (1)	Age distribution of 10,000 of each sex in the State and Tahsils	137-143
	7 (2)	Age distribution of 10,000 of each sex by main community	144-147
	7 (3)	Proportion of (a) Children under 10 and of persons over 60 to those aged 15-40. (b) Married females aged 15-40 per 100 females; for total population in certain communities	148
	7 (4)	Percentage of variation in population by age	149-150
	7 (5)	Actual ages returned at the enumeration	151
	7 (6)	Proportion of sexes by Natural Division and District	152
	7 (7)	Females per 1,000 males by main communities and age	153
	7 (9)	Distribution by civil condition of 1,000 of each sex, community and age	154-158
8. Part 1.		Means of livelihood (State)	159-171

Imperial Table No.	Subsidiary Table No.	CONTENTS OF THE TABLE										PAGE
8. Part 2.		Means of livelihood (Districts and Tahsils)										172-173
	8 (1)	General distribution of means of livelihood										174-177
	8 (2)	Independent workers per 1,000 Total Population										178
	8 (3)	Partly dependents following the activity per 1,000 Total Population										179
	8 (4)	Distribution per 1,000 Total Population										180-183
	8 (5)	Partly dependents following the activity of Total Population										184
	8 (6)	Means of livelihood of females and comparison of occupations										185-187
	8 (7)	Partially Agriculturists and Assistants employed										188
9.		Industries										189
10. Part 1.		Unemployment by age and locality for less or more than one year										190
10. Part 2.		Educated unemployment										191
11.		Literacy by community and age										192-215
	11 (1)	Literacy by age, sex and community										216-218
	11 (2)	" " " " locality										219
	11 (3)	" " community, sex and locality										220
	11 (4)	" in English by age, sex and locality										221
	11 (5)	Progress of Literacy since 1901										222
	11 (6)	Institutions and Scholars in 1941, 1931, 1921, 1911										224
12. Part 1.		Mother tongue										225-227
12. Part 2.		Bi-Lingualism										228-230
	12 (1)	Distribution of the population by language according to linguistic survey										231, 232
	12 (2)	Distribution by language of the population of each District										233
	12 (3)	Comparison of Tribe and Language										234
13.		Community distribution of population										235, 236
	13 (1)	General distribution of population by communities										237-240
	13 (2)	Distribution of the main communities by Districts										241
	13 (3)	Christian—Percentage Variation										242
14.		Variation in population of selected tribes										243-247
15.		A. Europeans and Allied Races (including Armenians)										248, 249
		B. Anglo-Indians										250
16.		Summary Figures for Districts and Tahsils										251, 252
Provincial Table 1.		Area and Population of Tahsils and Districts										253
" "	2.	Population of Districts and Tahsils by communities and literacy										254, 255

Subsidiary Table No. 8 (6)—contd.

MEANS OF LIVELIHOOD OF FEMALES AND COMPARISON OF OCCUPATIONS.

Group No.	Means of Livelihood.	Number for 10,000 of the female population.		Females per 10,000 Males (excluding subsidiary occupation.)
		Independent workers + partly dependents in 1911.	Number of actual workers in 1931.	
1	2	3	4	5
90	Other (soap, candles, perfumes and toilet goods, etc.)	0.05	2,380
94	Manufacture of shellac and lac products	2	4,368
95	Rice pounders and huskers and flour grinders millers of cereals and pulses	1	7	1,35,714
96	Grain parchers, etc.	2	165	2,184
98	Butchers	0.8	1,714
101	Sweetmeat and condiment makers	0.05	2,500
104	Brewers and distillers	1	5,090
107	Others	0.4	300
108	Tailors, milliners, dress-makers and darners	4	2	1,097
111	Washing and cleaning	2	2	5,528
112	Barbers, hair-dressers and wig-makers	4	121
116	Lime-burners and cement-workers	1	11,200
117	Excavators and well-sinkers	4	4,909
118	Stone-cutters and dressers	5	2,456
120	Builders (other than buildings made of bamboo or similar materials)	0.3	2,031
125	Heat, light, electricity, motive power, etc., gas-works and electric light and power	0.03
129	Makers of musical instruments	1
132	Workers in precious metals, makers of jewellery and ornaments, enamellers, gilders, etc.	4	574
136	Scavenging	0.4	4	2,380
138	Ship-owners, boat-owners and their employees, officers, mariners, etc., ship-brokers, boatmen and towmen	0.03	435
141	Persons (other than labourers) employed on the construction and maintenance of roads and bridges	0.03
142	Labourers employed on roads and bridges	0.08	7	400
145	Palki, etc., bearers and owners	0.01
147	Porters and messengers	0.2	349
148	Railway employees of all kinds other than coolies	2	408
149	Labourers employed on railway construction and maintenance and coolies, and porters employed on Ry. premises	0.3	968
150	Post-office, telegraph, telephone and wireless services	0.03
153	Individual money-lenders	0.3	3,947
156	Trade in piece-goods, wool, cotton, jute, silk, hair and other textiles	3	1,544
157	Trade in hides, skins, leathers, furs, feathers, horns, etc., and the articles made of these	0.1
158	Trade in wood (not fire-wood)	3	37,813
159	Trade in barks, bamboos, canes, thatches and other forest produce	0.6	1,067
160	Trade in metals, machineries, knives, tools, etc.	0.6	588
163	Vendors of wine, liquors, aerated-waters and ice	1	1	1,726
164	Owners and managers of hotels, cook-shops, sarais, etc. (and employees)	0.01	5,000
165	Hawkers of drink and food-stuffs	1	6,364
166	Dealers in unprepared grain, seeds and pulses	0.05	889
167	Dealers in flour (ata, etc.), and prepared grain and pulses	14	10	3,860
168	Dealers in sweet-meats, sugar and spices	0.6	4	244
169	Dealers in dairy products, eggs and poultry	13	20	8,547
171	Dealers in fodder for animals	7	7	34,370
